Omni Marker™ Installation Instructions

Congratulations on your purchase of the finest electronic marker available today. Please follow these simple instructions to ensure proper operation of your Omni Marker™ for years to come.

1. Determine whether or not the Omni Marker™ needs to be secured to the object being marked. If so, attach the marker with one or two cable ties as necessary.

IMPORTANT

- If the object being marked is metallic, the marker should be placed at least four inches (10.2 cm) above the object and the space between should be filled with soil. If the object being marked is non-metallic, the marker can be placed directly over the object.
 - Omni Marker™ can be reliably detected if the distance between the locator and the marker is five feet (1.5 meters) or less. Do not bury the marker deeper than this.
2. Place the marker over the object to be marked as shown below. **The marker can be buried in any orientation.**
 3. Cover the marker with six inches (15.2 cm) of soil to prevent movement during backfill.
 4. Backfill the hole or trench normally.

Omni Marker™ is a trademark of Tempo®. Patent numbers 5,699,048, 6,097,293, other patents pending. ©2002 Tempo Research Corporation - All Rights Reserved
