Schedule of limitations:

- 1) The fuse must be mounted in such a way that creepage and clearance distances aren't impaired in any way.
- 2) The fuse is suitable for use in intrinsically safe equipment for voltages not exceeding 190V peak.
- 3) Maximum surface temperature rise at 170% rated current: ≤750mA=40°C, 1A=55°C, 3A=118°C and 5A=135°C.

#### Description

The 259-UL913 Series offers a range of encapsulated fuses certified under the UL 913, the standard for intrinsically safe electrical equipment, to operate in hazardous locations. Ideal for use in the oil, gas, mine, chemical process, and pharmaceutical industries, the 259-UL913 fuse was designed to limit the energy and temperature generated during its operation. In addition to UL913, these fuses meet ATEX and IECEx requirements. The fuse design and its encapsulant are suitable for use in intrinsically safe apparatus and associated apparatus for voltage not exceeding 125V rms (190V peak).

#### Features

- Encapsulated and sealed (1mm minimum)
- Global hazardous location certifications
- 0.62A - 5A range options
- Designed to operate within hazardous environments

#### Applications

- Testing, measuring or processing electronic and electrical equipment

#### Reference Standards
