

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

**1-by-2
Multi-Port
Insertion Tool**

**Application Tooling
Specification Sheet**

Order No. 62202-9884

FEATURES

- Lightweight tool used in the insertion of a SFP, SFP+, and zSFP+™ connector in a PCB
- Inserts connector to a PCB without damage to the board
- This tool is used in place of tool 62202-9890 when the “Keep Out Zone” is reduced to 1.20mm. See Figure 1.

SCOPE

Products: Small Form-factor Pluggable SFP, SFP+, and zSFP+™, 1-by-2 Multi-Port Connector with Press-fit PC Tails

Connector Series No.	Connector Order No.			
74754	74754-0210	74754-0211	74754-0214	74754-0215
	74754-0220	74754-0221	74754-0223	
73927	73927-0250	73927-0254		
111111	111111-0210	111111-0212	111111-0216	111111-0220
111112	111112-0210	111112-0220	111112-0230	111112-0240

Notes:

1. See the following pages for tooling operation instructions.
2. These tools require a “Keep Out Zone” around the connector free of components. The rear of the connector should be .200” (5.08mm). The right and left sides should be .080” (2.00mm). See Figure 1.

Figure 1

Description

The following Instructions are used for inserting the 1 x 2 cage assemblies into a PCB.

Operation

1. By hand, place a connector assembly on the PCB.
2. Place the tool on the connector assembly (closed end to the back end of the connector). See Figure 2.
3. Place tool, connector, and PCB, in a press of suitable size and force, and seat the connector assembly shown. The support under the PCB must have clearance for the connector pins if they pass through the PCB.

Note: The insertion tool does not contact the PCB when the connector is fully seated.
