OPERATION:

Intended for prototyping purposes only, follow the steps below:

1. Place the connector on a flat surface.
2. For feed through or feed-to, line up the wire into position above the connector.
3. Using the tool, press the wire into the housing making sure the insertion tool clears the terminals.
4. Push down until the bottom of the wire is touching the housing and the top of the wire is below the strain relief eagles on both sides of the connector or one end if it is the last connector of the harness. See Figure 1.
5. Molex does not repair this tool due to the inexpensive nature of these tools.
