

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

**PUREX**  
FUME EXTRACTION SYSTEMS

Brochure 01/13

*“Protecting People  
and the Environment  
with Innovative Technology”*

## Introduction

Purex offers an extensive range of fume extraction solutions. These range from machines to protect a single person to powerful centralised systems to cater for multiple users or high volume continuous automated processes (e.g. a PCB production line).

Purex has the experience, products and support infrastructure to help ensure that:

- The correct machine is specified first time.
- The process performs at the optimum level.
- Employees are protected from hazardous fumes.
- The company complies with health & safety legislation
- Product quality is maintained
- Process machinery is protected from dust and fumes.
- Contaminated air is filtered, not pumped into the environment.

## APPLICATIONS

- Laser Coding and Marking
- Continuous Ink Jet Coding and Marking
- Laser Engraving
- Wide Format Printing
- Dye Sublimation
- Reflow & Wave Soldering
- Manual Soldering
- Laser & Robotic Soldering
- Underfill & Conformal Coating
- Cleanrooms & Laboratories
- Education & Engineering

# Protecting

### NEW....

#### FumeCube Max

- Ideal for dusty applications & lead free solder.
- Can be used with small lasers, in dentistry, in jewellery making and many other applications.
- Uses patented filter technology.

### NEW....

#### Tip Extraction Kits

- Individual kits to fit tip extraction onto popular models of soldering iron.
- Prevents tip cooling.
- Simple to install and comfortable to use.

### NEW....

#### Large Diameter Arms

- Ideal for applications requiring high airflow.
- Can be attached to a Purex extractor to give mobility.
- Fully adjustable.

### NEW....

- 113669 filter for Acidic Vapours such as HCN or for engraving ABF plastic.
- 200316 high performance F8/F9 pre-filter pad for FumeCubes.
- 125mm connection kits for conformal coating and other systems.
- Parts and Spares information for easy reference.

# People and the Environment with Innovative Technology

## Health & Safety Legislation

Local and international health and safety legislation (such as COSHH, NIOSHH, OSHA etc) states that it is the employers responsibility to protect the health, welfare and safety of their employees. Failure to do so can result in expensive legal action, potential fines and poor employee relations.

## The Need for Fume Extraction

Many types of dust and fume are hazardous to health if inhaled. People can become permanently sensitised to fumes which means that continued exposure, even to very small amounts of fume, may cause asthma attacks or other respiratory diseases. A high performance fume extraction system will help to:-

- Protect employee health.
- Ensure compliance with Health & Safety regulations such as **OSHA, NIOSH C.O.S.H.H, MAK, AFNOR and HSG258** or equivalent.
- Increase production speeds.
- Reduce complaints by operators due to odours, dust and vapours.

- Avoid the possible cost of health compensation claims.
- Reduce the cost & time to clean laser lenses, conveyors, guarding, soldering machines and other equipment.
- Reduce product contamination.
- Provide a better working environment.
- Reduce downtime.

## Which Extraction System?

There are usually two types of extraction system available:-

- External - pump contaminated air outside
- Internal - at source capture and filtration or LEV (local exhaust ventilation) system

In our opinion the best system to use is an LEV system such as a Purex. These capture fumes at the source thereby preventing fumes escaping into the workplace. They also filter hazardous particles and gasses which would otherwise be pumped into the outside environment causing pollution.

Using an internal filter system also avoids issues with environmental regulations and potential complaints from neighbouring businesses about fumes and odours.

Purex LEV systems sit next to the process and the extraction rate can be altered precisely to suit the application. Purex machines are also easy to move if the process moves.

LEV systems have additional benefits over external exhaust systems.

See comparison table below...

“Purex LEV engineers are qualified to BOHS P601 or P602”

## COMPARISON: Exhaust into the Environment System “vs” Purex LEV System...

Comparison Question	Exhausting into the Environment	Purex LEV System
How long will it take to install the system?	Several days on average.	In many cases just minutes.
Will there be any disruption in the workplace?	Scaffold, ladders etc. may be required in several places, disrupting work for lengthy periods.	Minor, if any.
Can the system be moved?	Only with scaffold etc. and disruption to work.	Yes. Simply disconnect and push to new location.
Are holes in the building required?	Yes. They need to be specially cut and sealed.	No.
Are external emissions regulations a problem?	Company must investigate and obey local laws.	Not applicable.
Is there any energy lost e.g. heating costs?	Energy (and therefore money) is wasted when heated or conditioned air is pumped outside.	No energy or heat is lost as the air is recycled. So costs are lowered.
Are there any ducting / installation costs?	Potentially expensive - as ducting needs to be purchased and specialist installation is required.	Minimal if any, depending on process.
Are there any cleaning costs?	Specialist cleaning required to prevent risk of fire or contamination. Again, scaffold, disruption & cost.	One annual service is recommended to comply with regulations such as COSHH.
Are there any decontamination costs?	Specialist decontamination may be required.	None.
Can fumes be drawn back into the workplace?	Yes. Through windows or vents.	Fumes are captured by highly efficient filters
Could there be disputes with my neighbours?	Yes. Over hazardous fumes and odours.	Not applicable.

# Fume Extractor Selector Guide

## SOLDERING & ELECTRONICS MANUFACTURING

Machine	Arm Extraction, Cabinets & Cows				Tip Extraction	Reflow	Wave
	Max No. Arms 38mm	Max No. Arms 100mm	Max No. Cleancabs	Max No. Cows	Max No. Soldering Iron Tips	Oven Extract Volume Required m³/hr	Oven Extract Volume Required m³/hr
FumeCube (inc MAX)	1 or 2	-	-	1 or 2	1*	-	-
FumeBuster	-	-	1 or 2	1 or 2	-	-	-
FumeSafe	-	-	-	-	3 up to 15	-	-
2tiP	-	-	-	-	1 or 2	-	-
200	3	1	1	2	up to 30	-	-
400	6	1	1-2	4	-	-	-
200i	3	1	1	2	up to 30	-	-
200i-HP	-	-	-	-	up to 50	-	-
400i	6	1	1-2	4	-	-	-
800i	9	2	2-4	6	-	-	-
1500i	12	5	4-8	8	-	Below 900	-
2000i	15	5	6-12	10	-	Below 1500	Below 1500
5000i	36	10	12-24	20	-	Over 1500	Over 1500

Notes:

- The selection is based on the use of a standard connection kit.
- A larger extraction machine may be required depending on the layout and the type of fume or dust.
- \* Selective soldering machines only, not suitable for handheld tip extraction.
- Continuous use may require a machine with larger filtration capacity.
- In some cases more arms/cows can be used e.g. for non coalescing vapours such as solvents or where airflow valves can be opened and closed.

**IMPORTANT: Choose a vacuum control machine for Arm and Tip extraction and a volume control machine for other applications. We also have solutions for conformal coating, selective soldering, vapour phase and more, please contact us for more information.**

## LASER ENGRAVING

Size of Laser Engraving Machine		Alpha 200	Alpha 400	Xbase 200	Xbase 400	400i	800i	800i 2-Tier (High Dust)	1500i 3-Tier (Acrylic)	2000i	5000i
Light Use	Heavy Use*										
Small		●	■	●	■	-	-	▲	-	-	-
	Small	x	●	x	●	-	-	▲	-	-	-
Medium		x	x	x	x	●	■	▲	-	-	-
	Medium	x	x	x	x	x	●	▲	■	-	-
Large		x	x	x	x	x	x	▲	●	■	-
	Large	x	x	x	x	x	x	▲	-	●	■
Extra large open bed lasers		x	x	x	x	x	x	x	x	●	■

Approximate laser bed sizes:

Small - 16"x12", Medium - 24"x12", Large - Anything over this.

- Normal selection.
- Select if extra filter capacity is required and/or additional airflow is required to extract from multiple lasers or heavy duty applications.
- (-) May also be considered.
- x Unit not usually specified for application.
- ▲ Consider if continually lasing acrylic.

Notes: Always select a volume control machine.

- The selection is based on the use of standard connection kit.
- \* Heavy use includes high proportion of cutting, lasers with a deep bed and constant use. Contact Purex for further advice.
- The 800i 3 tier unit is designed for use where the application has low dust, but high gas emissions. The 2 tier is designed for applications producing high dust emissions.
- In applications with extremely high dust emissions, a Cascade inline filter can be considered.

# Fume Extractor Selector Guide

## CODING & MARKING

Laser Coding & Marking									
CPM (Codes per Minute)		FumeCube MAX*	200i	400i	800i 2-Tier (High Dust)	800i 3-Tier (High Gas)	1500i	2000i	5000i
Good Enclosure	Poor Enclosure								
<200		●	●	■	-	-	-	-	-
	<200	x	x	●	■	-	-	-	-
200-500		x	x	●	■	-	-	-	-
	200-500	x	x	x	●	■	-	-	-
>500		x	x	x	●	■	-	-	-
	>500	x	x	x	x	x	●	■	-
Machines for Lasing PVC		x	x	▲	▲	▲	▲	▲	▲

- Normal selection.
- Select if extra filter capacity is required and/or additional airflow is required to extract from multiple lasers or heavy duty applications.
- (-) May also be considered.
- x Unit not usually specified for application.
- ▲ Optional "PVC" machines should be used when lasing onto PVC.
- \* For low wattage lasers or occasional use.

**Notes: Always select a volume control machine.**

1. The selection is based on the use of a standard connection kit.
2. The 800i 3 tier unit is designed for use where the application has low dust, but high gas emissions. The 2 tier is designed for applications producing high dust emissions.
3. A poor enclosure is where less than 4 sides of the process are enclosed.

Continuous Inkjet Coding & Marking			
Small Character Inkjet Printers	200	400	800i
See Notes	●	■	■

- Normal selection.
- Select if additional airflow is required to extract from multiple inkjet heads or if the controller unit has cooling fans installed.

**Notes: Always select a volume control machine.**

There are many different makes and models of inkjet printers available. Please contact Purex or your local representative for advice on which model is correct for particular applications.

**IMPORTANT:**

- This is a guide only, many factors influence the choice of fume extraction system. For more help and information please contact Purex or your local representative
- Purex recommends the use of anti static hose with continuous inkjet printers.

**6 Connection Hose Kit**

PAGE 26-28

**Legend:**

- 1) Air inlet - 80mm safe seal.
- 2) Pre-filter.
- 3) Main Filter (HEPA location). †
- 4) Main Filter (Carbon location). †
- 5) Clean air returned to workplace.
- 6) Filter locking handle.
- 7) Filter identification label.
- 8) Debris tray.

All machines are mounted on four castors for increased mobility.

† Standard Filter Only

**7 Machine Interfacing (Optional)**

Allows the Purex system to interface with a piece of equipment connected to it.

- **Start/Stop Control:** Extraction unit starts/stops when a connected piece of equipment is switched ON/OFF.
- **Filter Blocked Warning:** A signal is sent to a connected piece of equipment to trigger an alert or to shut it down.
- **Remote ON/OFF Switch:** 5M cable & switch

See PAGE 34

## Digital Control System

A dedicated control, monitoring and display system unique to Purex fume extractors. All functions are fully automatic, all the user has to do is set the appropriate airflow on installation. The features of this system are designed to:

- Lower energy consumption by using variable speed motors and automatic flow control.
- Increase filter life by using the optimal extraction rate.
- Further protect people by constantly monitoring exhaust emissions.
- Interface with other equipment e.g. a laser.
- Maintain a constant extraction rate to prevent fume escape or damage to equipment.

## System Features...

- Automatic electronic flow control - maintains a constant extraction rate even as the filter blocks
- Adjustable airflow
- Clear and informative graphic display
- Gas and Particle Sensors on the exhaust
- Low capital and running costs
- Quick change pre-filters deliver longer filter life
- Submicronic (HEPA) filtration removes 99.997% of particles down to 0.3 microns
- Activated carbon filtration removes harmful gas
- Simple to install and quiet in operation
- Easy to relocate
- Precision made from stainless steel

## Includes:

- 1 x Main filter
- 4 x Pre-filter pads
- 1 x Connection Kit
- 1 x Power cable

## Accessories

Please see the accessories section at the back of this brochure.

Optional Clean Air Cowl - 190039

PVC Version Available

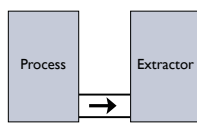

Air Compressor Available For This Model

**5 Main filter**

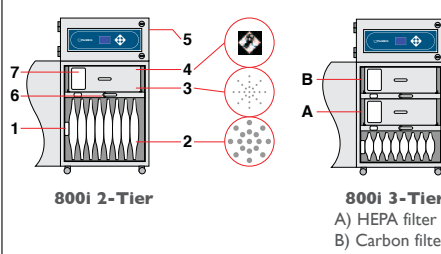

Options: Code: † Use in combination with 202272  
**(2-Tier)** HEPA/Chemical (std) or.. 113652  
 HEPA/Twin Chemical or.. 113660  
 HEPA/Chemical Cleanroom† 113658 \* Must be specified for CJJ printing applications.  
**(3-Tier)** HEPA (std) and.. 113650  
 Chemical (std) or.. 113651  
 Solvent Lock\* 113667

**6 Connection Hose Kit (Optional)**

**PAGE 26-28**  
 For PVC applications please contact us.

**800i 2-Tier**

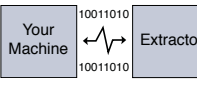

**800i 3-Tier**  
 A) HEPA filter  
 B) Carbon filter

**Legend:**  
 1) Air inlet - 100mm safe seal.  
 2) Pre-filter.  
 3) Main Filter (HEPA location). †  
 4) Main Filter (Carbon location). †  
 5) Clean air returned to workplace.  
 6) Filter locking handle.  
 7) Filter identification label.

All machines are mounted on four castors for increased mobility.

† Standard Filter Only

**7 Machine Interfacing (Optional)**

Allows the Purex system to interface with a piece of equipment connected to it.

- **Start/Stop Control:** Extraction unit starts/stops when a connected piece of equipment is switched ON/OFF.
- **Filter Blocked Warning:** A signal is sent to a connected piece of equipment to trigger an alert or to shut it down.
- **Remote ON/OFF Switch:** 5M cable & switch

See **PAGE 34**

## Digital Control System

A dedicated control, monitoring and display system unique to Purex fume extractors. All functions are fully automatic, all the user has to do is set the appropriate airflow on installation. The features of this system are designed to:

- Lower energy consumption by using variable speed motors and automatic flow control.
- Increase filter life by using the optimal extraction rate.
- Further protect people by constantly monitoring exhaust emissions.
- Interface with other equipment e.g. a laser.
- Maintain a constant extraction rate to prevent fume escape or damage to equipment.

## System Features...

- Automatic electronic flow control - maintains a constant extraction rate even as the filter blocks
- Adjustable airflow
- Clear and informative graphic display
- Gas and Particle Sensors on the exhaust
- Low capital and running costs
- Quick change patented Labyrinth pre-filters deliver longer filter life
- Submicronic (HEPA) filtration removes 99.997% of particles down to 0.3 microns
- Activated carbon filtration removes harmful gas
- Simple to install and quiet in operation
- Easy to relocate and precision made from stainless steel

## Includes:

- 1 x Main filter (2-tier)
- 2 x Main filters (3-tier)
- 2 x Labyrinth Pre-filters
- 1 x Power cable (no plug)

## Accessories

--	--	---

**5 Connection Hose Kit**

PAGE 26-28

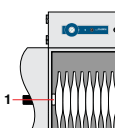

**Legend:**

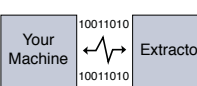

- 1) Air inlet - 80mm safe seal.
- 2) Pre-filter.
- 3) Main Filter (HEPA location).
- 4) Main Filter (Carbon location).
- 5) Clean air returned to workplace.
- 6) Filter locking handle.
- 7) Filter identification label.

All machines are mounted on four castors for increased mobility.

The Alpha Dust has a labyrinth bag only.

**6 Machine Interfacing (Optional)**

- **Start/Stop Control:** Extraction unit starts/stops when a connected piece of equipment is switched ON/OFF.
- **Filter Blocked Warning:** A signal is sent to a connected piece of equipment to trigger an alert or to shut it down.
- **Remote ON/OFF Switch:** 5M cable & switch

See **PAGE 34**

Allows the Purex system to interface with a piece of equipment connected to it.

## Controls

**Visual and Audible Filter Blocked Warning**  
Alerts the operator when a filter starts to block so that a replacement filter can be acquired and downtime can be avoided.

**LED Filter Status**  
Green = Filter OK  
Yellow = Filter nearly full  
Red = Filter full, replacement required

Interface with other equipment e.g. a laser optional.

## System Features...

- Automatic electronic flow control - maintains a constant extraction rate even as the filter blocks
- Adjustable airflow
- VariColour filter blocked warning system
- Low capital and running costs
- Quick change, patented Labyrinth pre-filters deliver longer filter life
- Submicronic (HEPA) filtration removes 99.997% of particles down to 0.3 microns
- Activated carbon filtration removes harmful gas
- Simple to install and quiet in operation
- Easy to relocate
- Precision made from stainless steel

## Includes:

- 1 x Main filter
- 2 x Labyrinth pre-filters
- 1 x Connection Kit
- 1 x Power cable

Note: Alpha Dust does not contain a main filter.

## Accessories

Please see the accessories section at the back of this brochure.

- Precision made from stainless steel

## Includes:

- 1 x Main filter
- 1 x Labyrinth Pre-Filter
- 1 x Power cable

What to specify...

1. Model

3. Pre-filter

4. Main filter

3-15 Tip Fume Extraction Unit	
<b>Voltage</b>	<b>230V ±10% or 120V ±10%</b>
<b>Vacuum Control</b>	<b>072200</b>
Wattage	0.45 kW
Frequency	50Hz / 60 Hz
Cabinet height	493 mm
Cabinet width (not inc hose)	471 mm
Cabinet depth (not inc hose)	430 mm
Cabinet weight (inc filters)	26 Kg
Construction	Stainless Steel
Construction	Precision engineered brushed stainless steel units. High performance continuous run brushless motors. Quick and simple to relocate.

3 Replacement Pads	
	
Pre Filter	Exhaust Filter
<i>Pre Filter Options:</i>	<i>Code:</i>
F8/F9 Pack of 4	200098
<i>Exhaust Filter Options:</i>	<i>Code:</i>
Single	200053

4 Replacement Main filter	
	
<i>Options:</i>	<i>Code:</i>
HEPA/Chemical (std)	110531
Chemical	110532
or Chemical Special	110542
HEPA/Chemical Cleanroom	110533
Solvent Lock	110541

<i>Pipe kit (100165) includes 32mm Ø:</i>	<i>Code:</i>
6 x 1.5M x 32mm pipe (3 pre drilled)	500050
4 x 90° bends	500080
2 x Swept T's	500100
4 x Straight connectors	500060
2 x End caps	500120

Also includes machine to pipe connector hose  
Code - 100170

## Supplied with 3 universal iron kits - 300001

### Controls

#### Visual and Audible Filter Blocked Warning

Alerts the operator when a filter starts to block so that a replacement filter can be acquired and downtime can be avoided.

### Controls & System Features...

- Speed Control
- Dual voltage brushless blower
- Low capital and running costs
- Quick change pre-filters deliver longer filter life
- Submicronic (HEPA) filtration removes 99.997% of particles down to 0.3 microns
- Activated carbon filtration removes harmful gas
- Simple to install and quiet in operation
- Easy to relocate
- Precision made from stainless steel
- Filter blocked alarm and LED

### Includes:

- 1 x Main filter
- 1 x Pre-filter pad
- 1 x Exhaust filter
- 1 x Power cable
- 1 x Connection kit
- 1 x Pipework kit
- 3 x Universal iron kits

### Accessories

Please see the accessories section at the back of this brochure.

What to specify...

1. Model

3. Pre-filter

4. Main filter

2 Tip Fume Extraction Unit	
<b>Voltage</b>	<b>230V ±10%</b>
<b>Vacuum Control</b>	<b>072120</b>
Wattage	0.135 kW
Frequency	50Hz / 60 Hz
Cabinet height	275 mm
Cabinet width (not inc hose)	286 mm
Cabinet depth (not inc hose)	291 mm
Cabinet weight (inc filters)	9.8 Kg
Construction	Stainless Steel
Construction	Precision engineered brushed stainless steel units. High performance continuous run brushless motors. Quick and simple to relocate.

3 Replacement Pre-filter Pad	
	<p>Options:</p> <p>F5 Pack of 4 (std)      Code: 200225</p> <p>F6 Pack of 4              Code: 200226</p>

4 Replacement Main filter	
	<p>Options:</p> <p>HEPA/Chemical (std)      Code: 110507</p>

### Controls & System Features...

- Run LED
- Speed Control
- Low capital and running costs
- Quick change pre-filters deliver longer filter life
- Submicronic (HEPA) filtration removes 99.997% of particles down to 0.3 microns
- Activated carbon filtration removes harmful gas
- Simple to install and quiet in operation
- Easy to relocate
- Precision made from stainless steel

### Includes:

- 1 x Main filter
- 1 x Pre-filter pad
- 1 x Power cable
- 1 x Connection kit
- 1 x End cap

### Accessories

Please see the accessories section at the back of this brochure.

# FumeBuster

What to specify...

1. Voltage

2. Pre-filter

3. Main filter

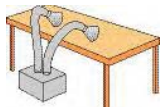

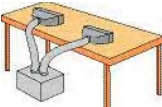

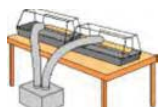

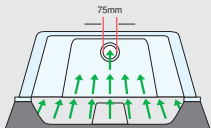

4. Capture Kit (For one or two stations)

Machine Only	
<b>Voltage</b>	<b>230V ±10%</b>
<b>Vacuum Control</b>	<b>070362</b>
Wattage	0.3 kW
Frequency	50Hz
Cabinet height (inc castors)	350 mm
Cabinet width (not inc hose)	425 mm
Cabinet depth (not inc hose)	415 mm
Cabinet weight (inc filters)	25 Kg
Construction	Precision engineered brushed stainless steel units. High performance continuous run brushless motors. Quick and simple to relocate.

## Controls

### Visual and Audible Filter Blocked Warning

Alerts the operator when a filter is blocked so that a replacement filter can be acquired.

### LED Filter Status

Green = Filter OK

Red = Filter full, replacement required

## System Features...

- Audible and visual filter blocked alert
- Low capital and running costs
- Quick change pre-filters deliver longer filter life
- Submicronic (HEPA) filtration removes 99.997% of particles down to 0.3 microns
- Activated carbon filtration removes harmful gas
- Simple to install and quiet in operation
- Easy to relocate
- Precision made from stainless steel

## Includes:

- 1 x Main filter
- 4 x Pre-filter pad
- 1 x Port blank (530430)
- 1 x Power cable

## Accessories

Please see the accessories section at the back of this brochure.

Contact Purex or your local distributor for more information.

**Captivair units are available for other printer models, please contact Purex or your local distributor for further information.**

### Features...

- Captures fumes at source
- Reduces fumes escaping into the workplace
- Promotes a more pleasant working environment
- Can help reduce headaches and nausea caused by fumes
- Helps prevent fumes escaping into neighbouring buildings and rooms
- Bespoke kits for each printer model
- Can aid compliance with health and safety regulations

### System Features...

- Visual filter blocked alert
- Low capital and running costs
- Activated carbon filtration of ink vapour
- Simple to install and quiet in operation
- Easy to relocate

### Includes:

- 2 x Main filters
- 1 x Power cable

# Inline Filter Units

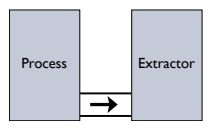

What to specify...

Pre-filter

Connection Kit

1	Cascade	Spark Arrestor
<b>Part number</b>	<b>890180</b>	<b>890241</b>
Cabinet height (inc castors)	1063 mm	1063 mm
Cabinet width (not inc hose)	430 mm	430 mm
Cabinet depth (not inc hose)	430 mm	430 mm
Cabinet weight (inc filters)	30 Kg	30 Kg
Note: Vacuum or Volume	The Cascade Box is fitted with a silicone vacuum sensing tube. The tube should be connected to the inlet on all vacuum machines e.g. Xbase, Alpha and Digital Tip and Arm Applications. It should not be connected on volume machines.	Not Applicable.

2	Cascade Pre-filter	Spark Arrestor
	<p><i>Description:</i> Needlefelt Cascade Code: 111107 or</p> <p><i>Description:</i> Labyrinth F8/F9 Composite Code: 111117</p>	<p><i>Description:</i> Supplied with a collection tray</p> 
	 <p><b>Cascade Version Shown</b></p>	

3	Connection Hose Kit
	<p>1 x 1M of 80mm hose 1 x 100-80mm reducer 1 x 80mm coupling 1 x 100mm coupling 2 x 70-90mm hose clips</p> <p>Code: 100184</p>

## Inline Filter

The Cascade Box acts as an additional prefilter to capture particles in applications where large amounts are produced. The filter can be emptied when full and the operator can periodically shake the filter to increase filter life.

- Removes large particles from the process air
- Extends the life of the filters in the fume extractor
- Can be used on problematic applications where large quantities of dust are produced
- Filter can be seeded to help deal with sticky particles
- Filter can be emptied and shaken to prolong life\*

- The use of this unit means the operator does not have to buy a new, larger fume extraction machine
- Low capital and running costs
- Simple to install and easy to relocate
- Precision made from stainless steel
- \* cascade filter only

## Spark Arrestor

This inline unit is used to prevent sparks entering the extraction machine. It works by extinguishing sparks against metal surfaces and collecting hot materials in a drop out box.

## Includes:

- 1 x Cascade filter
- or 1 x Labyrinth filter
- or 1 x Drop out box
- 1 x Connection kit

## Accessories

Please see the accessories section at the back of this brochure.
