

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# LTE MIMO ANTENNA

#### LOW PROFILE MIMO ANTENNA WITH GPS

The light transit low profile MiMo antenna range has been designed to support the new generation of vehicular LTE routers. The antenna enclosure contains three isolated high performance antenna elements; two ultrawideband elements covering 698-2700MHz support MiMo/diversity at cellular/LTE frequencies and a high performance GPS antenna with an integrated 26dB gain LNA and high quality filtering to combat noise.

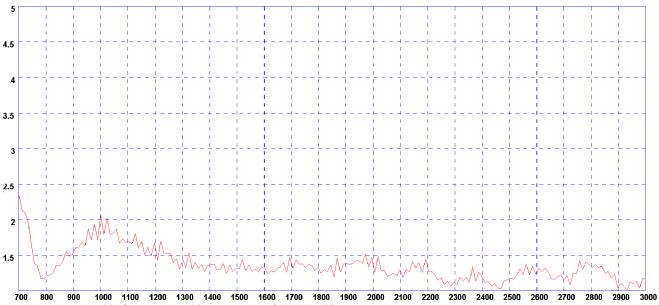

The antenna does not require a metalic ground plane, and maintains a high level of performance even when mounted on a non-metalic surface.

#### Typical VSWR cellular / LTE elements\*

 $^{\ast}$  VSWR measured in free space with 4.5m (15') of CS29 cable.

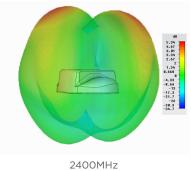

#### Typical Isolation cellular / LTE elements\*

 $^{\ast}$  Isolation measured in free space with 300mm (1') of cable.

### Typical 3D Pattern - Elements 1 & 2

Note: All pattern and gain measurements taken in free space without additional ground plane.
