Handheld

Ethertronics' antennas deliver on the key needs of device designers for higher functionality and performance in smaller/thinner designs. These innovative antennas provide compelling advantages for a 2.4 GHz enabled handheld devices, media players and other mobile devices.

#### **Real-World Performance and Implementation**

Antennas may look alike on the outside, but the important difference is inside. Other antennas may contain simple PIFA or monopole designs that interact with their surroundings, complicating layout or changing performance with use position. Ethertronics' antennas utilize patented IMD technology to deliver a unique size and performance combination.

#### **Greater Flexibility**

Ethertronics' IMD technology enables the advance antenna design that delivers superior performance in reception critical applications. 1001013 is capable of being used in off-ground and on-ground (over metal) environments.
