

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

3M™ Scotchlok™ Copper Compression Connectors, 10000 and 11000 Series

Data Sheet

January 2014

Description

3M™ Scotchlok™ Copper Compression Connectors, 10000 Series are one-piece, standard-barrel, seamless copper connectors and are designed to cover a wide range of conductor sizes from 6 AWG through 1000 kcmil (MCM). The 11000 Series are one-piece, seamless, long-barrel copper connectors and are designed to cover a range of conductor sizes from 2/0 AWG through 1000 kcmil (MCM). They are designed to connect copper conductors. Each connector is electro-tin plated to resist electrolytic corrosion. They are installed using standard industry tooling. Chamfered ends and an integral center cable stop ensure simplicity and ease of conductor insertion.

**Agency Approvals
and Self
Certifications**

UL Listed, UL Standard 486A-486B, File No. E23438

CSA Certified, File No. 015503

Features

- Simple installation using readily available tools
- Integral center cable stop
- Manufactured using tin-plated copper
- Color coded printing for easy connector identification

Applications

- Standard-Barrel: To connect copper conductors from 6 AWG through 1000 kcmil (MCM)
- Long-Barrel: To connect copper conductors from 2/0 AWG through 1000 kcmil (MCM)
- For low and medium voltage up to 35 kV
- For indoor and outdoor use

Typical Properties

Not for specifications. Values are typical, not to be considered minimum or maximum. Properties measured at room temperature 73°F (23°C) unless otherwise stated.

The 10000 and 11000 Series connectors, when crimped with approved die sets, can be used on cables with an operating temperature of 221°F (105°C) and an emergency overload rating of 284°F (140°C). The connectors pass the requirements of UL486A (Underwriters Laboratories standard for safety) and are CSA Certified. The current rating of these connectors meets or exceeds the current rating of the conductor size for which it is intended.
