EtherHelix™ Mission Critical GPS Antenna

1.575 GHz Circularly Polarized

Supports: Aviation, GPS Navigation Systems, Fire & Rescue, Asset Tracking, Automotive, Security, Home Network application

The world's smallest stand alone circular polarized GPS Antenna

Height: 34.93 mm
Diameter: 15.0 mm

EtherHelix GPS Antenna Quadhelix design

1.575 GHz

KEY BENEFITS

Smallest Effective Size

Ethertronics' antennas require a smaller keep-out area for surrounding components, leading to a smaller effective size.

High Performance

Ethertronics' high efficiency and simple design rules lower development risk and speed time-to-market without sacrificing performance. Plus, high RF selectivity eliminates the cost and space for band-pass circuitry.

Reliability

Products are the latest RoHS version compliant.

APPLICATIONS

- GPS enabled phones
- GPS navigation systems
- Mobile devices
- Tracking
- Wireless Monitoring
- IoT
- Medical/Healthcare applications
- Mission Critical Applications
- Commercial/Communication
- Radar
- Industrial Automotive
- First Responders

EtherHelix™ series of GPS Quad Helix Isolated Magnetic Dipole™ (IMD) antennas deliver on the key needs of device designers for higher functionality and performance in the worlds smallest Stand alone Circular polarized external and internal designs. These innovative antennas provide compelling advantages for GPS enabled cell phones, navigation equipment, and other mobile devices.

Real-World Performance and Implementation

Antennas may look alike on the outside, but the important difference is inside. Other antennas may contain simple PIFA or monopole patch designs that inter-act with their surroundings, complicating component layout or changing performance with use position. Ethertronics' antennas utilize patented IMD technology to deliver a unique size and performance combination.
