

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

The high-current PCB connection for more power on board:
 150 A /1000 V with wires up to 50 mm², transmitted right to the
 PCB!

The LXXX 15.0 – with its proven steel clamping-yoke
 technology in a compact standard housing – integrates
 the latest market requirements for security, power density
 and miniaturization in power electronics. It connects
 these requirements into an efficient solution for the entire
 value-creation chain – including development, production,
 installation and maintenance.

The function and form of the application's connection method
 plays a key role. It influences the application's design,
 reliability, usability and costs. With the Substitution of
 For example, with the replacement of complex constructions
 involving bolts or bus bars, the PCB can be transformed into
 a system platform that is both consistent and sustainable into
 the future – even for high-current applications.

The LXXX 15.0 reduces size and complexity while at the same
 time improving application integration. In so doing, it fulfils the
 requirements of power electronics better than the established
 mechanisms and connection elements.
