

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Address: A1208, Overseas Decoration Building, #122 Zhenhua RD., Futian, Shenzhen, China

Material Guard, cover : Resin (PPE+PS) UL File No.E82268 94V-0
 Filter : Polyurethane foam UL File No.E74916(S) 94HF-1

Dimensions (unit : mm)

80mm sq. type

Model : 109-1002F13 (13PPI) 109-1002F20 (20PPI)
 : 109-1002F30 (30PPI) 109-1002F40 (40PPI)

Replacement filter (5 sheets each)

| 60mm sq. type | 80mm sq. type |
|---------------------|---------------------|
| 109-1003M13 (13PPI) | 109-1002M13 (13PPI) |
| 109-1003M20 (20PPI) | 109-1002M20 (20PPI) |
| 109-1003M30 (30PPI) | 109-1002M30 (30PPI) |
| 109-1003M40 (40PPI) | 109-1002M40 (40PPI) |
| 92mm sq. type | 120mm sq. type |
| 109-1001M13 (13PPI) | 109-1000M13 (13PPI) |
| 109-1001M20 (20PPI) | 109-1000M20 (20PPI) |
| 109-1001M30 (30PPI) | 109-1000M30 (30PPI) |
| 109-1001M40 (40PPI) | 109-1000M40 (40PPI) |

PPI Particles Per Inch : Indicates the number of holes per inch. Note that the higher the number, the finer the grain of the sponge.

Airflow and Static Pressure Characteristics

For the Sanyo double chamber unit (120mm sq. type)

Reference Diagram For Mounting

● Replacement filters can be replaced by taking off the front part of the filter kit. There is no need to remove the screws.

● Filter kit is one of the option to keep air in the chassis clean filtering dust in external atmosphere when pulling-air cooling is implemented. The filter kit is hooked up through mounting hole of fan frame with screw as well as finger guard. Some performances (airflow & static pressure) of the fan motor decreases when filter kit is hooked up. ● This Filter Kit is composed of 3 components, including a guard, a filter and a cover. It is delivered as a finished product at delivery, saving assembly time when mounting. It can be mounted by inserting a screw in the apertures of the cover. ● The filter and cover can be easily removed from the guard with one touch. There is no need for fan removal when undertaking maintenance. ● Operating temperature limit is between -10°C to +60°C (non condensing). ● The filter will deteriorate with age, and the level of deterioration will vary upon usage conditions. Please be aware that the filter has a greater tendency to deteriorate under high temperature and humidity. For long-term storage, please store under the temperature range of 10°C to 30°C, humidity range of 20% to 65%. Usage and storage period is approximately 2 years. ● Cooling ability decreases with filter contamination due to clogging. Filter replacement is recommended approximately every six months of usage. Please replace the filter if deterioration or clogging is seen at inspection. ● When replacing the filter, please use genuine SANYO DENKI filters. ● Do not water-wash the filter. ● Avoid use and storage under high temperature or humidity, direct sunlight or exposure to ultraviolet light, or in corrosive gas. ● No nuts or screws for use in attachment included.
