

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Make!Sense Max with USB micro cable

SKU: 114990228

(images/product/114990228 1.jpg)

Description

Make!Sense is an easy-to-use platform for making learning fun and interactive. It's a universal interface system that allows you to quickly and easily connect different types of sensors to your computer or smart phone. You can use Make!Sense to observe movement, moisture, light, temperature, even your own heartbeat!

Make!Sense is for educators, designers, and tinkerers. Each of the topic bundles comes with a set of specialized experiments and the necessary sensors, so you can quickly get students involved in hands-on learning, without any coding or soldering!

This USB Make!Sense board which has several operating modes, including:

Keystroke Mode

Using simple configuration software, users can assign keystrokes to different values for up to 8 sensors. Keystrokes will be sent back to any application as if the user typed them at the keyboard. This is a simple yet powerful mode for any language, but especially useful for Scratch, Python and other learning languages.

Data stream Mode

Using a more sophisticated language like Processing, users can manipulate the streaming data from up to 8 sensors.

Science Experiment Mode

Users run an application to display, track, measure and save data coming from up to 8 sensors.

Use Make!Sense to:

- Collect data from experiments, like our included examples or others that you design!
- Connect computer programs to the physical world, like building a steering wheel controller from scavenged parts.
- Make a new musical instrument that you play without touching anything.
- Teach about physical computing and human-computer interaction.
- Enhance programs written in Scratch, Processing, Python, or other languages!
