

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Quick Reference Guide: AMP Pivot Connector Series

The AMP Pivot Connector Series is a toolless, user friendly solution for terminating signal and low power connections. Simply feed a pair of unstripped wires into the connector and complete the termination by pressing down the pivoting stuffer with your thumb or index finger. Insulation displacement contacts (IDCs) in the connector eliminate the need for stripping wires and make the termination even easier.

This series is ideal for field-installed products and space constrained applications. There are two versions available depending on the size and requirements of the application. Tyco Electronics offers pivot and pivot II connectors with varying dimensions. Please see the charts inside to differentiate pivot from pivot II and find the connector that is right for your application.

FEATURES AND BENEFITS

- Eliminates need for a termination tool--just use your finger!
- Small size and toolless capability make it suitable for space constrained applications.
- Terminate wires from either side of the connector or pass wires completely through for bridging connections.
- Perfect for field-installed products--IDCs eliminate the need to strip wires.

PRODUCT APPLICATIONS

- Space-constrained applications
- Garage door openers
- Sprinkler systems
- Alarm systems
- Telephone jacks
- Pet fences
- Low voltage lighting

AMP Pivot Connector Series

HOW TO USE AN AMP PIVOT CONNECTOR

Wire Insertion

After the connector has been applied to the pc board, the unstripped wires may be inserted into the corresponding wire insertion hold of the stuffer.

Termination

While holding the wires firmly in place, push down on the stuffer until it bottoms to terminate the wire.

DRAWINGS FOR AMP PIVOT CONNECTORS

One Pair Pivot Connector

Top view of a one pair, single entry pivot connector in a closed position. Drawing shows connector width.

Closed Position

Side view of a one pair, single entry pivot connector in a closed position. Drawing shows a wire fed into the connector, the connector height, stuffer length and tine length.

Open Position

Side view of a one pair, single entry pivot connector in an open position. Drawing shows connector height and height when the stuffer is open.

AMP Pivot Connector Series

QUESTIONS TO ASK AT DESIGN IN

- **What wire gauge are you using?**
Pivot series can accept AWG 22-24.
Pivot II series can accept AWG 22-26.
- **Will the wire need to be passed through the connector?**
If no, single or double entry styles will work.
If yes, only double entry style will work.
- **In what type of environments will this connector be used?**
These connectors are available to be greased filled in order to be used in extreme environments. (See part number table on previous pages.)
- **What is the significance of the Stuffer Labels 'T and R'?**
T and R stand for Tip and Ring, which is commonly used terminology when working with telephone jacks in the telecommunications industry.
- **What tooling is required to support these connectors?**
No tooling is needed to support these connectors other than something to cut the wires to the appropriate sizes. The IDC contacts make pivot a toolless solution.
- **What if you need to use an AWG that is outside the AMP Pivot Connector Series gauge?**
We recommend using the terminal block family, which can accept AWG 12-30. For more information please see the landing page at www.tycoelectronics.com/products/terminalblocks
- **How many wires can a single connector use?**
We offer one, two and four pair connectors. Each pair is capable of accommodating two wires and multiple connectors can be aligned side-by-side.

Disclaimer

While Tyco Electronics has made every reasonable effort to ensure the accuracy of the information in this catalog, Tyco Electronics does not guarantee that it is error-free, nor does Tyco Electronics make any other representation, warranty or guarantee that the information is accurate, correct, reliable or current.

Restriction on the use of Hazardous Substances (RoHS)

At Tyco Electronics, we're ready to support your RoHS requirements. We've assessed more than 1.5 million end items/components for RoHS compliance, and issued new part numbers where any change was required to eliminate the restricted materials. Part numbers in this catalog are identified as:

RoHS Compliant — Part numbers in this catalog are RoHS Compliant, unless marked otherwise. These products comply with European Union Directive 2002/95/EC as amended 1 January 2006 that restricts the use of lead, mercury, cadmium, hexavalent chromium, PBB, and PBDE in certain electrical and electronic products sold into the EU as of 1 July 2006.

NOTE: For purposes of this Catalog, included within the definition of RoHS Compliant are products that are clearly "Out of Scope" of the RoHS Directive such as hand tools and other non-electrical accessories.

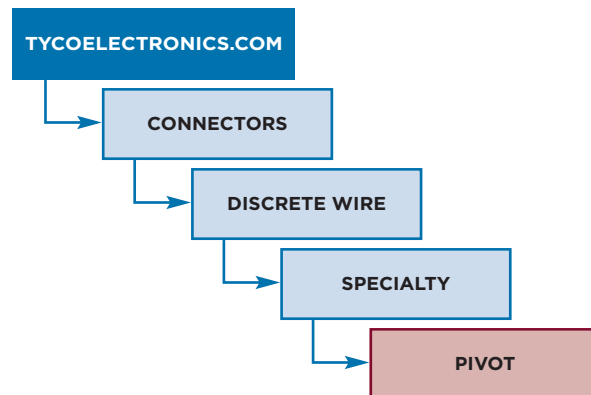

NOTE: Information regarding RoHS compliance is provided based on reasonable inquiry of our suppliers and represents our current actual knowledge based on the information provided by our suppliers. This information is subject to change. For latest compliance status, refer to our website referenced at right.

Getting the Information You Need

Our comprehensive on-line RoHS Customer Support Center provides a forum to answer your questions and support your RoHS needs. A RoHS FAQ (Frequently Asked Questions) is available with links to more detailed information. You can also submit RoHS questions and receive a response within 24 hours during a normal work week. The Support Center also provides:

- Cross-Reference from Non-compliant to Compliant Products
- Ability to browse RoHS Compliant Products in our on-line catalog
- Downloadable Technical Data Customer Information Presentation
- More detailed information regarding the definitions used above
- So whatever your questions when it comes to RoHS, we've got the answers at www.tycoelectronics.com/leadfree
