

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

SOLARLOK

Connectivity Systems for PV Installers

Building a greener tomorrow

TE Connectivity is committed to bringing the promise of renewable energy to the world. The SOLARLOK product offering provides a simple and reliable interconnection of solar systems. TE has worked with leaders in the solar industry to lower costs, increase reliability, and devise new and innovative ways to create and apply solar products.

Early involvement pays off in competition advantage

With approximately 7,000 engineers and 11 global design centers, plus manufacturing facilities in approximately 25 countries, we put a premium on innovation when it comes to helping companies solve tough design problems. Talking to us early on in your design cycle will give you the full benefit of our expertise.

We can help you:

Shorten the design cycle

Reduce costs

Increase reliability

Design for manufacturability

In short, we can help you achieve a sustainable competitive advantage. Whether it's showing you the best existing products, offering a value added solution or designing a new product, our commitment to advanced engineering and world-class manufacturing delivers innovation that can advance any solar project. Our Electronic Components segment is a world leader in passive electronic components, including connectors and interconnect systems, relays, switches, circuit protection devices, touchscreens, sensors, and wire and cable. TE's ability to serve your present and future requirements is realized through the synergies of a strong R&D program and our expertise in materials science, product design and process engineering, all supported by our network of 5000-plus knowledgeable, sales representatives and customer service personnel.

Mechanical, Environmental and Electrical Testing Capabilities

Mechanical Testing Equipment

Force-deflection curves are generated to verify that spring contact properties meet design criteria.

Electrical and Thermal Test Equipment

Contact resistance and temperature rise are measured and recorded automatically. These parameters help to establish/verify current carrying capacity, and de-rating curves. Test samples are isolated to minimize the influence of external variables such as air movement.

Climate cabinets and temperature shock chambers

Components/assemblies are exposed to cold, heat, moisture, and temperature change. Thermal shock is accomplished with the 2-chamber method. Environmental chambers operate from -70°C to +180°C enabling simulation of real-world conditions.

4-component pollutant gas unit/crimp validation

Slow-motion bending and vibration testing simulates line movements in the wire, stressing the crimped termination. Industrial atmospheres are generated with a gas mixture of SO₂, H₂S, NO₂ and Cl₂.

3D X-ray computer tomography

3D X-ray computer tomography provides high resolution three-dimensional non-destructive analysis capability.

**TE manufactures the
SOLARLOK product
line on state of the
art manufacturing
equipment.**

Manufacturing Capabilities

The Trutnov, Czech Republic facility offers a repeatable manufacturing process which produces a 100% automatically inspected and electrically tested junction box. For quality control purposes, each junction box is "laser etched" with a unique serial number.

Our electrical test equipment has four independent heads to automatically test each connection rail and diode in the popular four rail junction box. Assembly equipment automatically verifies the production of the cable assemblies and attachment to the junction box. The true position of the contact in the mating coupler housing and proper torque of the screw nut are some of the critical process checks made to each unit. A vision system is incorporated into the junction box assembly equipment. Polarization and molded features are inspected by the same vision system to contribute to the production of a quality product and a repeatable manufacturing process.

The SOLARLOK product is currently manufactured in Europe, Asia and the USA.

TE Manufacturing Facility in Trutnov, Czech Republic

The SOLARLOK Product Concept

System Features

Junction Box

- Variable wiring options
- Simple, fast and cost-effective assembly
- Flat, low profile design
- High current carrying capacity
- Good thermal balance
- Connectorized or direct wire configurations
- Up to four outputs possible
- Up to six internal rails
- Customer-specific solutions
- TÜV and UL approved

Cable Couplers

- Simple on-site processing
- Mating safety provided by keyed housings
- Semi-automatic assembly capability possible
- Multiple plugging and unplugging cycles
- Accommodates solar cable with different insulation diameters
- High current carrying capacity
- Wide temperature operating range
- TÜV and UL approved

Solar Cable

- Dual wall insulation
- Electron beam cross-linked
- Excellent resistance to UV, water, ozone, fluids, salt, general weathering
- Excellent resistance to abrasion
- Halogen free, flame retardant, low toxicity
- Very low smoke emissions
- Excellent flexibility and stripping performance
- Temperature Rating : -40°C up to +125°C
- Nominal Voltage : Vo/V 1800/3000 VAC, 2600 VDC
- Test Voltage : 6kV, 50Hz, 5min
- Bending Radius : ≥ 5 x outer diameter
- TÜV and UL approved

Simple and Reliable Interconnection of Solar Systems

Market expansion of the formerly regulated energy supply sector, increased global environmental awareness and governments committing themselves to more stringent environmental targets have opened up new opportunities for the photovoltaic industry.

Having served a niche market in the past, the photovoltaics industry now has the opportunity to move into mass production, realizing economies of scale and gaining a greater market share of the world's energy mix.

TE has contributed to the establishment of this environmentally-friendly technology with the introduction of its SOLARLOK connector system.

The SOLARLOK connector system delivers a flexible system solution for easy and reliable interconnections from photovoltaic modules to the DC/AC converter. The entire system concept is based on cost-effective and reliable processing of individual interconnection system components. This significantly reduces installation costs of the solar energy system.

The junction box concept is based on a flexible, open system structure, which allows serial as well as parallel interconnection via direct wire connect or separable connectors. Within the junction box, up to six termination places rails are available for photovoltaic foil connection. If required by the customer, the junction box can be delivered pre-configured with diodes, jumpers, plug connectors, and solar cable pigtailed.

The male and female cable couplers were designed for high voltage and high current-carrying capacity in addition to the well-established IP 67 sealing requirement in the photovoltaic industry. Mating safety is provided by polarity keyed housings, fully shrouded contacts, reliable high cycle life, and a squeeze to release connection system. In addition, a wide temperature range and fulfillment of worldwide standards for photovoltaic connection systems complement the robust product specification.

5-String Combiner Box

Technical Data

Output Wire : Cu ONLY, 90°C, 14-4 AWG

Maximum Voltage : 600 V

Maximum Output Current : 75 A

Maximum Continuous Current : 60 A

Maximum Current Per String : 15 A

Maximum Fuse Rating : 15 A

Maximum Module Isc Per String : 9.6 A

Enclosure Type : NEMA 3

Ambient Temperature

: -35°C to 50°C [-31°F to 122°F]

Negative Output Terminal Torque

: 4 Nm [35 in-lbs]

Positive Output Terminal Torque

: 14-10 AWG = 4 Nm [35 in-lbs]

: 8 AWG = 4.5 Nm [40 in-lbs]

: 6.4 AWG = 5.1 Nm [45 in-lbs]

Ground Terminal Block Torque

: 4Nm [35 in-lbs]

Features & Benefits

- Combines up to 5 PV strings
- Converts to standard wires
- Completely pre-assembled
- Plug & play design provides labor savings and minimizes installer error during installation
- Uses existing products currently produced by Tyco Electronics
- UL 1741 listed

The SOLARLOK combiner box assembly is used to combine up to five strings in a preterminated connectorized weather-resistant enclosure to meet National Electric Code (NEC) requirements for series fusing of photovoltaic (PV) modules (solar panels).

The combiner box assembly consists of a box, cover (with hinges), transparent dead front lid (under the cover), and 10 pre-terminated SOLARLOK connectors each with a removable dust cover. The box features 4 knockouts (for output wiring), lock tab, mounting slots and pre-wired grounding bolt.

The interior of the box holds 5 holder fuse blocks pre-wired to the positive SOLARLOK connectors, 5 terminal blocks pre-wired to the negative SOLARLOK connectors, and an equipment terminal block used to ground the equipment. Fuses are not included.

Part Number : 1954283-1

Transition Box

Technical Data

Output Wire : Cu ONLY, 90°C, 14-4 AWG

Maximum Voltage : 600 V

Maximum Current Per String : 20 A

Maximum Module Isc Per String : 12.8 A

Enclosure Type : NEMA 3

Ambient Temperature

: -35°C to 70°C [-31°F to 122°F]

Output Terminal Torque

: 4 Nm [35 in-lbs]

Features & Benefits

- Converts to standard wires
- Completely pre-assembled
- Plug & play design provides labor savings and minimizes installer error during installation
- Uses existing products currently produced by TE
- UL 1741 listed

The SOLARLOK transition box is used to convert outdoor wire to more cost effective building wire for use in protective conduit. The transition box assembly consists of a pre-terminated connectorized weather-resistant enclosure to meet National Electric Code (NEC) requirements, a cover (with hinges), a transparent dead front lid (under the cover), and 10 pre-terminated SOLARLOK connectors, 5 pre-wired to the negative terminal block and 5 pre-wired to the positive terminal block, each with a removable dust cover. The box features 4 knockouts (for output wiring), a lock tab, mounting slots and a pre-wired SOLARLOK grounding bolt.

As part of expanding the SOLARLOK product line, TE produces wire that is designed to meet the harsh environmental conditions typical of photovoltaic installations. The flexible, dual wall, halogen free and cross linked solar wire offers long term stability with TÜV UL approval. Its outstanding features include: high resistance against environmental conditions such as humidity, UV-radiation and ozone. In addition, it has excellent resistance to abrasion and temperature extremes. The wire has a high dielectric withstand voltage and due to its fine-stranded, tin plated copper conductor, it is easy to handle, bend, route, and to strip.

Standards

TÜV certified according to 2PfG

Solar Cable : Type USE-2

Technical Data

Electrical Features

Voltage Rating : 600 V DC

Mechanical Features

Operating Temperature : up to +90°C

Standards

UL certified to 854 (USE-2) : 10-14 AWG

UL File E314122 and E314123

Features & Benefits

- Insulation provides resistance to U.V., water, ozone, fluids, salt, gasoline, and petroleum general weathering
- High strand count conductor provides flexibility and stripping performance
- Multiple cable diameters available

USE-2 approved solar cable - for the North American market UL approved cable is offered in 10 through 14 AWG. This cable is approved for USE-2, XHHW-2, RHW-2, or RHH. Sunlight, gasoline, and petroleum resistance make this an ideal cable for any solar installation in North America. A high strand count increases the flexibility and tinned copper wire strands ease the use of this cable.

Type USE-2 (For US Installation), UL Approved Cable

Color	Part Number	Cross Section AWG	Diameter (inch)	Reel Package (ft)
Black	1986166-1	14	0.17	7,500
	1986166-2	14	0.17	500
	1986166-3	14	0.17	2,500
	1986165-1	12	0.19	7,500
	1986165-2	12	0.19	500
	1986165-3	12	0.19	2,500
	1986164-1	10	0.21	7,500
	1986164-2	10	0.21	500
	1986164-3	10	0.21	2,500

Wiring Example with Extension Cables

Configuration Example at 4.0 mm²

Cable Assembly

More variants (cable length, wire diameter, color) upon request.

Grounding System : Grounding Bolt

Technical Data

Materials

Connector & Hardware

: Stainless Steel (Passivated)

Electrical Features

Short Term Current Test (UL 467)

- : 6 AWG = 1530A (6 seconds)
- : 8 AWG = 180A (4 seconds)
- : 10 AWG = 750A (4 seconds)
- : 12 AWG = 470A (4 seconds)

Mechanical Features

Securness Test (ul 486A-B)

- : 6 AWG = 18lbs (30 minutes)
- : 8 AWG = 8lbs (30 minutes)
- : 10 AWG = 5lbs (30 minutes)
- : 12 AWG = 5lbs (30 minutes)

Pull out Test (ul 486A-B)

- : 6 AWG = 100lbs (1 minute)
- : 8 AWG = 90lbs (1 minute)
- : 10 AWG = 80lbs (1 minute)
- : 12 AWG = 70lbs (1 minute)

Application Tooling

Flex socket wrench or wrenches

Standards

UL 467 listed

UL File #E69905

A requirement for UL 1703
solar panel listing

CSA C22.2 No. 41-07

Product Offering

Part Number	Description	Thread	Dim "A"	Package Quantity
2058729-1	6-12 AWG	#8-32 UNC	.380	100
2106831-1	Long Shank 6-12 AWG	#10-32 UNF	.700	100

*Instruction Sheet : 408-10262

Dimensions

Features & Benefits

- Rugged and compact hex bolt design made from stainless steel.
- Quick and easy mounting procedures.
- Bottom edge feature cuts through the anodized aluminum surface when securing the hex bolt to the module frame.
- Standard tooling can be used with the hex nuts.

Grounding System : Grounding Clip

Technical Data

Materials

Housing : Durable PBT 30% glass filled polyester. Material is outdoor & UV rated
Contact : High conductivity, copper

Electrical Features

Meets the tough requirements of photovoltaic grounding applications and the 2008 National Electrical Code.

Mechanical Features

Meets the tough requirements for grounding applications for solid copper wire.
 12 AWG applications will withstand 70lbs pull while the 10 AWG applications will withstand 80lbs pull

Application Tooling

No special tooling is required -- only flathead screwdrivers and channel lock pliers (optional)

Product Offering

Part Number	Screw	Nut	Package Quantity	Wire Size
1954381-1	#10-32 Thread Cutting	None	100	10-12 AWG
1954381-2	#8-32 Pan Head	#8-32	100	10-12 AWG
1954381-3	#8-32 Pan Head	#8-32 Star Washer Nut	100	10-12 AWG
1954381-4	#8-32 Long Shark	none	100	10-12 AWG
1954381-5	#10-32 Thread Cutting	none	100	6 mm ²
