

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

BUSBAR CONNECTIVITY

QUICK REFERENCE GUIDE

THINGS TO CONSIDER WHEN CHOOSING BUSBAR PRODUCTS

Application: Properties like dimensions, shape, isolation, plating, base material, and use of connector should be considered when choosing a busbar product.

Current and Voltage: Does the connector require power only, or a combination of power and signal? How much current is required in the application? Keep in mind that busbar products performance is usually measured in amperes (or amps). The voltage is also highly important as it defines the spacing between the contacts and is related to safety requirements.

Hot-Pluggability: Will the application be mated while under electrical load? If so, a hot-pluggable connector is required. Many of the products in this guide have been approved for use in hot-plug applications.

TYPICAL POWER CONNECTOR APPLICATIONS

- Busbar based power distribution
- Power racks
- Rack mounted switching power supplies
- Core network energy systems
- Cellular base stations
- PSU power distribution
- Servers, storage & network routers
- Industrial
- Computer
- Modular power supply
- Alternative (green) energy systems)
- Power inverters

CROWN CLIP Jr. Connectors

Screw Mount

Reference Part Number*
1982995-1 | 1982995-2

- Mates directly to a power bus bar
- Provides a space efficient interconnection in solder or screw mount configurations
- Low insertion/extraction forces
- Ideal for power supply/distribution applications
- Bus Bar misalignment: $\pm .75$ mm

Solder Tail

Reference Part Numbers*
2178410-1 | 2178411-1 | 1551953-1

- Blind mate
- Hot pluggable
- Copper busbar, plated nickel or suitable alternative
- Current = 170A
- Anti Over Stress Feature
- Mating Bus Bar Thickness: 3.0 ± 0.1 mm

CROWN CLIP Sr. Connectors

CROWN CLIP Sockets

Reference Part Number*
1643906-1

CROWN CLIP II Sockets

Reference Part Number*
1643903-1

Dual CROWN CLIP Sockets

Reference Part Number*
1926671-1

CROWN CLIP Sockets Features:

- Compact, high-current, blind-mate design. Supports true hot-plug, complying with safety regulatory requirements for current interruption under load.
- Utilizes the well-known ELCON CROWN BAND contact technology.
- Mates to a solid blade (CROWN CLIP) or laminated bus bar tabs for feed and return currents (CROWN CLIP II and Dual CROWN CLIP).
- CROWN CLIP is a single pole, float mount socket provides up to 6 degrees of float. CROWN CLIP II is a dual pole, float-mount socket offering ± 1.0 mm of bus bar misalignment. Dual CROWN CLIP is a dual pole, feed-through socket allowing insertion of mating blade from both top or bottom of socket.
- Mating bus bar blades to be .125" (3.18mm) or .118" (3.00mm) thick. Insertion length .650" (16.50mm) minimum, 1.00" (25.40mm) maximum

Features

- Board-to-Busbar, Wire-to-Busbar, Board-to-Busbar
- Silver plated Copper alloy
- Mate with .125" or .062" thick plated bus bar providing a separable connection that eases assembly, inspection, and troubleshooting
- Ideal for computer, industrial control, modular power supply or other applications that demand low millivolt drop and reliable separation. Commonly used in rack-mounted equipment with bus bar architecture.
- Blind mateable (misalignment up to + .060" [1.52mm] for both series)

Features

- Replacement for threaded studs
- No loose nuts = no fretting/heat rise
- Quick Connect/Disconnect
- Safety Locking feature
- Currents from 50A to 250A
- Wire sizes from 2.5 to 95mm²
- Color coding available
- Straight and right angle versions

Features

- Insulated flat copper cable conductors and associated interface components enable solutions to power distribution challenges through its unmatched packaging flexibility.
- Single and dual conductor cable types with various conductor and insulation thicknesses available. Standard cable types support 80-135 Amps and operating voltages up to 600V.
- Flat power cables offer a number of advantages over both round jacketed power cables or traditional bus bars.
- Variety of interfaces for end of cable or mid-cable terminations enable high application versatility and customization.
- Flat cables can be easily formed and will hold their shape, enabling high packaging flexibility. Cables can be easily routed through confined spaces.
- Fully touch-safe. Less copper compared to round jacketed cable; therefore less weight and lower cost per ampere of rated current.
