Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

FEATURES
- Lightweight tool used in the insertion of a zQSFP+ cage in a PCB
- Inserts connector to a PCB without damage to the board

SCOPE
<u>Products</u>: Small Form-Factor Pluggable zQSFP+ 1-by-1 Cages with Press-Fit PC Tails

Connector Series No.	Connector Order No.					
100014	100014-1231	100014-1232	100014-1233	100014-1234	100014-1235	100014-1236

Notes:
1. See the following page for tooling operation instructions.
2. This tool requires a "Keep Out Zone" to be free of components. The tool overhangs the rear of the cage to allow for light pipe options. The right and left sides should be .25" (6.4mm). See Figure 1.

KEEP OUT ZONE

6.4mm Maximum (BOTH SIDES)
Operation

1. By hand, place a cage assembly on the PCB. Make sure all compliant tails are engaged in PCB holes.
2. Place the tool on the cage assembly, oriented as shown in Figure 2.
3. Place the tool, cage, and PCB in a press of suitable size and force, and seat the cage as shown. The PCB support (not furnished by Molex) must have clearance for the connector pins if they pass through the PCB.

Note: This insertion tool does not contact the PCB when the connector is fully seated.
