Tech Brush – Aluminum Handle

Product# 2040-2043

Product Description

Techspray's TechClean brushes are made of premium grade materials. Don't be fooled by cheap imports. Bristles are securely stapled in place, eliminating loose bristles.

Choose the Right Bristle Material for Your Needs:

Natural — Soft, resilient and long lasting. Hog bristles are stiffer than horsehair.

Metal — For burnishing, polishing, non-sparking static dissipation and deburring. Brass is a softer bristle than stainless steel.

Conductive aluminum handles act as a conduit between the charged surface and the path to ground. Use these brushes with a wrist strap to avoid a static discharge from damaging sensitive components.

Features / Benefits

- High quality USA made
- Bristles securely stapled to prevent bristle loss
- Eliminate contamination due to bristle loss
- Anodized aluminum handle -- strong & splinter free

Environmental Policy

Techspray[®] is committed to developing products to ensure a safer and cleaner environment. We will continue to meet and sustain the regulations of all federal, state and local government agencies.
