# Slim Metal Potentiometer Knob - 10mm Diameter x 10mm - T18

PRODUCT ID: 2058

## . Description

This slim and modern potentiometer is small and compact, yet looks good and has a nice feel. We hand selected the best knobs for your project in different sizes and varieties. This one is the **Slim Metal Knob 10mm diameter x 10mm Tall (T18 Splines)**.

It's a brushed aluminum knob with a shiny black (anodized?) coating. It kind of looks like the type of knob you'd find in a very fancy, modern kitchen. There's a silver mark on the black finish so you can know where you are and figure out where you're going. It's a good knob if you're looking for something basic and subtle and it's super tiny and subdued. We also have a taller version in the same style.

**This knob will not work on our Rotary Encoder (which has a D shaft)! It will work, however, on all of our Potentiometers (which have T18 shafts)**

## . **Technical Details**

- Diameter: 10mm / 0.4"
- Height: 10mm / 0.4"
- Weight: 1g
