

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

LUMAWISE LED HOLDERS

SOLDERLESS TERMINATION
OF CHIP-ON-BOARD (COB) LED

Today's market drive to mass adoption of solid state lighting technology requires rapid development and introduction of lighting fixtures that incorporate LED arrays. TE Connectivity provides easy to use LED holders that integrate thermal, electrical, optical and mechanical connections for leading edge luminaries.

Applications

- Spot Lights
- Track Lights
- Recessed Downlights
- High Bay Lights
- Retrofit Lamps
- Wall Sconces
- Street Lights
- Runway Lights

Key Benefits

- Solderless electrical connection to LED
- Integrated poke-in wire termination
- Snap-in LED retention on some versions
- Alignment features simplify installation
- Easy attachment of secondary optics
- High-reflectivity polymeric housing materials
- Wide operating temperatures

WALL SCONCES

RECESSED DOWNLIGHTS

LUMAWISE LED Holder Solutions

TE Connectivity provides a broad range of solderless LED holders that provide fixture designers an easier way to integrate LEDs into their designs.

The scalable, Type Z and custom holder platforms each offer the designer a unique suite of features and benefits.

Our LED holders form the core of the fixture ecosystem by integrating LED electrical, mechanical, thermal, and optical interconnectivity. These holders can accelerate time to market, minimize applied costs, facilitate easy integration, and improve assembly efficiency when compared to traditional methods of LED integration.

Type Z LED Holders

The Type Z LED holders provide a quick and easy solderless connection to LED arrays and are designed to enable customers to develop Zhaga compliant modules. Standard and low profile Type Z32 and Z50 LED holders feature snap-in LED retention that secures the LED in the holder during assembly and ensures proper positioning in the fixture. Offered with or without optics attachment features, the Type Z LED holders are available in a configuration to suit your needs. The optics attachment version functions with Carclo or LEDIL optics to provide the lighting designer with beam shaping flexibility in spot and downlight applications.

Scalable LED Holders

The Scalable LED holder platform enables connectivity to a wide range of LED arrays and is available in pre-assembled one piece & two piece configurations for ultimate design flexibility. The two piece design utilizes the same part for both positions and it's scalability makes it broadly applicable to multiple commercially available LED arrays. Designed with the future in mind, the Scalable LED holder platform is readily adaptable to tomorrow's LED arrays. The inherent flexibility of the platform allows accommodation of a virtually infinite range of LED package sizes and plating materials.

Custom LED Holders

TE offers a variety of custom LED holder solutions optimized for use with manufacturer specific LED arrays.
