Flex Cable for Raspberry Pi Camera or Display - 1 meter

PRODUCT ID: 2143

This cable will let you swap out the stock 150mm long flex cable from a Raspberry Pi Camera (either 'classic' or 'NoIR' type) or Raspberry Pi Display for a different size. Works great, just carefully open the connector on the Pi and slip this one in.

This cable is 1 meter long. We have cables in a ton of sizes so you can have the perfect fit. Each order comes with one cable, Pi Camera not included (but we have those in the shop as well)

Please note, we did test this length cable with our Pi Model B/B+ and a Pi Camera and it worked great but 1 meter is really long for this kind of camera protocol, so if you have a very electrically noisy environment (inside a tesla coil?) you may have corrupted images.

Technical Details

- o Dimensions: 1meter x 16mm x 0.2mm / 3.3ft x 0.6" x 0.01"
- o Weight: 7.5g
