

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

SUBCON-PLUS-PROFIB...

Fast connector for PROFIBUS systems

Data sheet
101610_en_10

© PHOENIX CONTACT 2017-03-27

1 Description

The **SUBCON-PLUS-PROFIB...** D-SUB series is specifically designed for use in PROFIBUS systems up to 12 Mbps. Under field conditions, it enables the quick and easy connection of the incoming and outgoing bus line.

The product range includes ten fast connectors:

Connection	Cable entry	Programming interface	Type	Order No.
Screw connection	Angled 35°	-	SUBCON-PLUS-PROFIB/SC2	2708232
		✓	SUBCON-PLUS-PROFIB/PG/SC2	2708245
	Angled 90°	-	SUBCON-PLUS-PROFIB/90/SC	2313698
		✓	SUBCON-PLUS-PROFIB/90/PG/SC	2313708
Push-in spring connection	Axial	-	SUBCON-PLUS-PROFIB/AX/SC	2744380
	Axial	-	SUBCON-PLUS-PROFIB/AX	2744377
Push-in spring connection	Angled 35°	-	SUBCON-PLUS-PROFIB	2744348
		✓	SUBCON-PLUS-PROFIB/PG	2744403
IDC connection	Angled 90°	-	SUBCON-PLUS-PROFIB/90/IDC	2313672
		✓	SUBCON-PLUS-PROFIB/90/PG/IDC	2313685

WARNING: Explosion hazard when used in potentially explosive areas

Connectors with screw connection or push-in spring connection: Follow the instructions provided here during installation and make sure you observe the safety notes.

The connectors with IDC connection have **no** ATEX approval and are suitable only for safe areas.

Make sure you always use the latest documentation.
It can be downloaded at phoenixcontact.net/products.

Features

- All connectors can be used for PROFIBUS cables with a solid or stranded copper wire.
- All versions already have an integrated termination resistor. This is switched on externally via a slide switch. Concurrently, the outgoing bus segment is switched off. This makes it easy to start up segment by segment while incorrect terminations are avoided.
- In addition, the connector housing with high-quality shielding ensures a high level of immunity to interference even at maximum data transmission speed.
- The connectors are designed for all standard PROFIBUS cables with an outside diameter of 8 mm (types A and B). When using Fast Connect cables, work is reduced to a minimum by using the PSM-STRIP-FC/PROFIB quick stripping tool.
- A special feature of the 35° angled connector is that the internal connection unit can be turned round. Whether the cable is to be inserted from the right or left can thus be decided on site.

3 Ordering data

Connectors with screw connection	Type	Order No.	Pcs./Pkt.
D-SUB 9 connector, pin, cable entry < 35°, bus system: PROFIBUS DP up to 12 Mbps, termination resistor can be switched on via slide switch, pin assignment: 3, 5, 6, 8	SUBCON-PLUS-PROFIB/SC2	2708232	1
D-SUB 9 connector, pin, cable entry < 35°, bus system: PROFIBUS DP up to 12 Mbps with PG D-SUB socket for connecting a programming device, termination resistor can be switched on via slide switch, pin assignment: 3, 5, 6, 8	SUBCON-PLUS-PROFIB/PG/SC2	2708245	1
D-SUB 9 connector, pin, cable entry < 90°, bus system: PROFIBUS DP up to 12 Mbps, termination resistor can be switched on via slide switch, pin assignment: 3, 5, 6, 8	SUBCON-PLUS-PROFIB/90/SC	2313698	1
D-SUB 9 connector, pin, cable entry < 90°, bus system: PROFIBUS DP up to 12 Mbps with PG D-SUB socket for connecting a programming device, termination resistor can be switched on via slide switch, pin assignment: 3, 5, 6, 8	SUBCON-PLUS-PROFIB/90/PG/SC	2313708	1
D-SUB 9 connector, pin, axial version with two cable entries, bus system: PROFIBUS DP up to 12 Mbps, termination resistor can be switched on via slide switch, pin assignment: 3, 5, 6, 8	SUBCON-PLUS-PROFIB/AX/SC	2744380	1
Plug with push-in spring connection	Type	Order No.	Pcs./Pkt.
D-SUB 9 connector, pin, axial version with two cable entries, bus system: PROFIBUS DP up to 12 Mbps, termination resistor can be switched on via slide switch, pin assignment: 3, 5, 6, 8	SUBCON-PLUS-PROFIB/AX	2744377	1
D-SUB 9 connector, pin, two cable entries < 35°, bus system: PROFIBUS DP up to 12 Mbps, termination resistor can be switched on via slide switch, pin assignment: 3, 5, 6, 8	SUBCON-PLUS-PROFIB	2744348	1
D-SUB 9 connector, pin, cable entry < 35°, bus system: PROFIBUS DP up to 12 Mbps with PG D-SUB socket for connecting a programming device, termination resistor can be switched on via slide switch, pin assignment: 3, 5, 6, 8	SUBCON-PLUS-PROFIB/PG	2744403	1
Connectors with IDC connection	Type	Order No.	Pcs./Pkt.
D-SUB 9 connector, pin, cable entry < 90°, bus system: PROFIBUS DP up to 12 Mbps, termination resistor can be switched on via slide switch, pin assignment: 3, 5, 6, 8	SUBCON-PLUS-PROFIB/90/IDC	2313672	1
D-SUB 9 connector, pin, cable entry < 90°, bus system: PROFIBUS DP up to 12 Mbps with PG D-SUB socket for connecting a programming device, termination resistor can be switched on via slide switch, pin assignment: 3, 5, 6, 8	SUBCON-PLUS-PROFIB/90/PG/IDC	2313685	1

Accessories	Type	Order No.	Pcs./ Pkt.
Quick stripping tool for PROFIBUS cable type Fast Connect	PSM-STRIP-FC/PROFIB	2744623	1
Stripping pliers for PVC-insulated cables, stripping range: 0.08 to 6 mm ² , can cut wires up to 6 mm ² stranded and 4 mm ² solid	QUICK WIREFOX 6	1204384	1
PROFIBUS cable, Fast Connect type, up to 12 Mbps (02YSY (ST)CY 1x2x22 AWG)	PSM-CABLE-PROFIB/FC	2744652	1
D-SUB connector, 9-pos., pin, assignment: 3, 5, 6, 8 Two M12 cable glands (B-coded) under 90° Bus system: PROFIBUS DP up to 12 Mbps Termination resistor via separate M12 terminator	SUBCON-PLUS-PROFIB/90/M12	2902318	1
D-SUB connector, 9-pos., pin, assignment: 3, 5, 6, 8 Two M12 cable glands (B-coded) under 35° Bus system: PROFIBUS DP up to 12 Mbps Termination resistor via separate M12 terminator	SUBCON-PLUS-PROFIB/35/M12	2902320	1
D-SUB connector, 9-pos., pin, assignment: 3, 5, 6, 8 Two M12 cable glands (B-coded) under 180° (axial) Bus system: PROFIBUS DP up to 12 Mbps Termination resistor via separate M12 terminator	SUBCON-PLUS-PROFIB/AX/M12	2902321	1

4 Connectors with screw connection or push-in spring connection

4.1 Safety regulations and installation notes

WARNING:

Observe the following safety notes when using the connector.

- The category 3 device is designed for installation in zone 2 potentially explosive areas. It meets the requirements of EN 60079-0:2012+A11:2013 and EN 60079-15:2010.
- Installation, operation, and maintenance may only be carried out by qualified electricians. Follow the installation instructions as described. When installing and operating the device, the applicable regulations and safety directives (including national safety directives) as well as general technical regulations must be observed. The data on safety technology is provided in this packing slip and on the certificates (conformity assessment, additional approvals where applicable).
- Do not repair the device yourself; replace it with an equivalent device instead. Repairs may only be carried out by the manufacturer. The manufacturer is not liable for damage resulting from non-compliance.
- The IP20 degree of protection (IEC 60529/EN 60529) of the device is intended for a clean and dry environment. Do not subject the device to mechanical and/or thermal loads that exceed the specified limits.
- The device is not designed for installation in zone 22.
- If, however, you wish to use the device in zone 22, it must be installed in a housing that complies with IEC/EN 60079-31. In doing so, observe the maximum surface temperatures. Observe the requirements of IEC/EN 60079-14.

4.2 Installation in zone 2

WARNING: Explosion hazard when used in potentially explosive areas

Make sure that the following notes and instructions are observed.

WARNING: Explosion hazard when used in potentially explosive areas

D-SUB interfaces may only be connected or disconnected when the voltage is disconnected. Screw the D-SUB mounting screws tight on all connectors.

- Observe the specified conditions for use in potentially explosive areas.
- The device should be installed so that a degree of protection of at least IP54 is achieved in accordance with EN 60529. To this end, a suitable, approved housing that meets the requirements of EN 60079-15 should be used.
- Only devices which are designed for operation in Ex zone 2 and are suitable for the conditions at the installation location may be connected to the circuits in zone 2.
- In potentially explosive areas, only connect and disconnect cables when the power is disconnected.
- The switches of the device that can be accessed may only be actuated when the power supply to the device is disconnected.
- Connection to the D-SUB interface is only permitted if the screw connection is fully tightened.
- Temporary malfunctions (transients) must not exceed the rated voltage by more than 40%.
- The device must be stopped and immediately removed from the Ex area if it is damaged, was subjected to an impermissible load, stored incorrectly or if it malfunctions.

4.3 SUBCON-PLUS-PROFIB(/PG)/SC2

SUBCON-PLUS-PROFIB/SC2	2708232
SUBCON-PLUS-PROFIB/PG/SC2	2708245
Connection	
Connector connection	9-pos. D-SUB pin strip
Programming connection	9-pos. D-SUB socket strip (only for SUBCON-PLUS-PROFIB/PG/SC2)
Interface connection	Screw connection
Cable entry	Either left or right
Connection cross section of screw terminal blocks	
Solid	0.14 mm ² ... 1.5 mm ² (26-16 AWG)
Stranded	0.14 mm ² ... 1 mm ² (26-18 AWG)
Insertion cycles	>200
Cable diameter	8 mm (± 0.4 mm)
Mounting screws	4-40 UNC
Maximum tightening torque	0.4 Nm
Pin assignment	3, 5, 6, 8
General data	
Degree of protection	IP40
Housing material	ABS, metal-plated
Nominal current I _N	100 mA
Max. operating voltage	5 V
Termination resistor	390 Ω - 220 Ω - 390 Ω (switchable)
Ambient conditions	
Temperature range	
Operation	-20°C ... +75°C
Storage/transport	-25°C ... +80°C
Relative humidity	75% at 25°C
Approvals	
UL approval	UL file no. 238705
ATEX	II 3 G Ex nA IIC T4 Gc X
Please follow the special installation instructions in the documentation.

Connection

Figure 4 Stripping

The following stripping tools are recommended:

- PSM-STRIP-FC/PROFIB, Order No. 2744623
- QUICK WIREFOX 6, Order No. 1204384

**NOTE: Malfunction**

Observe the specified stripping lengths.

WARNING: Explosion hazard when used in potentially explosive areas

D-SUB interfaces may only be connected or disconnected when the voltage is disconnected. Screw the D-SUB mounting screws tight on all connectors.

Cable entry can be from the right or left side. The connector supplied is pre-assembled for left-hand side entry.

Left-hand side cable entry

Figure 5 Left-hand side cable entry

- Strip off the conductors (see Figure 4).
- Loosen the housing screw. Lift off the top cover.
- Screw the stripped conductors into the corresponding connection block contacts.
- Always connect the incoming bus line to terminal block connections 1A/1B (even at the start of the bus system).
- Connect the outgoing bus line to terminal block connections 2A/2B. Observe the printing on the connection terminal blocks.
- Finally, close and screw tight the housing half shells. This creates the shield connection and strain relief for the bus line.

Right-hand side cable entry

Figure 6 Right-hand side cable entry

- Strip off the conductors (see Figure 4).
- Loosen the housing screw. Lift off the top cover.
- Lever the PCB out of the lower housing part near the cable entry. Use a screwdriver to do this.
- Insert the PCB in the upper housing part.
- Screw the stripped conductors into the corresponding connection block contacts.
- Always connect the incoming bus line to terminal block connections 1A/1B (even at the start of the bus system).
- Connect the outgoing bus line to terminal block connections 2A/2B. Observe the printing on the connection terminal blocks.
- Finally, close and screw tight the housing half shells. This creates the shield connection and strain relief for the bus line.

4.4 SUBCON-PLUS-PROFIB/90(PG)/SC

Connection

Figure 10 Stripping

The following stripping tools are recommended:

- PSM-STRIP-FC/PROFIB, Order No. 2744623
- QUICK WIREFOX 6, Order No. 1204384

NOTE: Malfunction

Observe the specified stripping lengths.

WARNING: Explosion hazard when used in potentially explosive areas

D-SUB interfaces may only be connected or disconnected when the voltage is disconnected. Screw the D-SUB mounting screws tight on all connectors.

The connector allows the incoming and outgoing bus lines to be quickly connected. The connector contacts are routed onto screw terminal blocks with colored labeling.

The integrated termination resistor can be switched and, when activated, concurrently switches off the outgoing bus line. In this way, the bus system can be started up segment by segment.

The strain relief is integrated in the housing half-shells. It is designed for standard PROFIBUS cable type A. The additionally integrated SUBCON-PLUS-PROFIB/90/PB/SC programming connection allows a programming or service device to be connected without interrupting the bus operation.

Figure 11 Connecting

- Strip off the conductors (see Figure 10).
- Remove the separating foil if necessary.
- Insert the single wires into the connection terminal blocks as far as they will go.
- Always connect the incoming bus line to terminal block connections 1A/1B (even at the start of the bus system).
- Connect the outgoing bus line to terminal block connections 2A/2B. Observe the printing on the connection terminal blocks.
- Finally, mount and screw tight the connection terminal blocks. This creates the shield connection and strain relief for the bus line.

Figure 23 Stripping

The following stripping tools are recommended:

- PSM-STRIP-FC/PROFIB, Order No. 2744623
- QUICK WIREFOX 6, Order No. 1204384

NOTE: Malfunction

Observe the specified stripping lengths.

WARNING: Explosion hazard when used in potentially explosive areas

D-SUB interfaces may only be connected or disconnected when the voltage is disconnected. Screw the D-SUB mounting screws tight on all connectors.

Cable entry

The SUBCON-PLUS-PROFIB/PG with programming interface is designed for left-hand side cable entry. The cable entry is not reversible.

For SUBCON-PLUS-PROFIB, the cable entry can be from the right or left side. The connector supplied is pre-assembled for left-hand side entry.

Left-hand side cable entry

Figure 24 Left-hand side cable entry

- Strip off the conductors (see Figure 23).
- Loosen the housing screw. Lift off the top cover.
- Insert the single wires into the connection terminal blocks as far as they will go. The conductors automatically make contact when inserted. To release the connection, press the orange release rocker.
- Always connect the incoming bus line to terminal block connections 1A/1B (even at the start of the bus system).
- Connect the outgoing bus line to terminal block connections 2A/2B. Observe the printing on the connection terminal blocks.
- Finally, close and screw tight the housing half shells. This creates the shield connection and strain relief for the bus line.

Right-hand side cable entry

Figure 25 Removing the connection block

Figure 26 Reversing the connection block

- Strip off the conductors (see Figure 23).
- Loosen the housing screw. Lift off the top cover.
- Lever the PCB out of the lower housing part near the rivets. Use a screwdriver to do this.
- Remove the connection block. Rotate it 180°.
- Insert the single wires into the connection terminal blocks as far as they will go. The conductors automatically make contact when inserted. To release the connection, press the orange release rocker.
- Always connect the incoming bus line to terminal block connections 1A/1B (even at the start of the bus system).
- Connect the outgoing bus line to terminal block connections 2A/2B. Observe the printing on the connection terminal blocks.
- Finally, close and screw tight the housing half shells. This creates the shield connection and strain relief for the bus line.

5 Connectors with IDC connection

The connectors with IDC connection have **no** ATEX approval and are suitable only for safe areas.

- Installation, operation, and maintenance may only be carried out by qualified electricians. Follow the installation instructions as described.
- Do not repair the device yourself; replace it with an equivalent device instead. Repairs may only be carried out by the manufacturer. The manufacturer is not liable for damage resulting from non-compliance.

Connection

Figure 30 Stripping

The following stripping tools are recommended:

- PSM-STRIP-FC/PROFIB, Order No. 2744623
- QUICK WIREFOX 6, Order No. 1204384

NOTE: Malfunction

Observe the specified stripping lengths.

The connector allows the incoming and outgoing bus lines to be quickly connected. The connector contacts are routed onto IDC terminal blocks with color labeling.

The integrated termination resistor can be switched and, when activated, concurrently switches off the outgoing bus line. In this way, the bus system can be started up segment by segment.

The strain relief is integrated in the housing half-shells. It is designed for standard PROFIBUS cable type A. The additionally integrated SUBCON-PLUS-PROFIB/90/PG/IDC programming connection allows a programming or service device to be connected without interrupting the bus operation.

Figure 31 Connecting

- Strip off the conductors (see Figure 30).
- Remove the separating foil if necessary.
- Insert the single wires into the connection terminal blocks as far as they will go.
- Always connect the incoming bus line to terminal block connections 1A/1B (even at the start of the bus system).
- Connect the outgoing bus line to terminal block connections 2A/2B. Observe the printing on the connection terminal blocks.
- Then close and screw on the terminal cover. This creates the shield connection and strain relief for the bus line.

6 Termination resistor

Note about connectors with screw connection or push-in spring connection:

WARNING: Explosion hazard when used in potentially explosive areas

The switches of the device that can be accessed may only be actuated when the power supply to the device is disconnected.

Figure 32 Termination resistor

- Use the slide switch to activate the termination resistors at the start and end points of the bus system. Concurrently, the connection terminal blocks (2A/2B) for the outgoing bus line are switched off.

The termination resistor must be deactivated at all other nodes in the bus system.

Length according to PROFIBUS specification

Transmission speed	Segment length	Permissible branch lengths per bus segment
9.6 kbps	1200 m	32 x 3 m
19.2 kbps	1200 m	32 x 3 m
45.45 kbps	1200 m	32 x 3 m
93.75 kbps	1200 m	32 x 3 m
187.5 kbps	1200 m	32 x 2 m
500 kbps	400 m	32 x 1 m
1500 kbps	200 m	32 x 0.3 m
3000 kbps ... 12000 kbps	100 m	Not permitted
