## : ©hipsmall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## IB IL 24/48 DOR 2/W-XC-PAC

## Inline digital output terminal, version for extreme conditions, 2 relay PDTs

## Data sheet

8463_en_01
© PHOENIX CONTACT 2015-08-12

## 1 Description

The terminal is designed for use within an Inline station. It has two floating relay PDTs which are independent of each other.
Thanks to special engineering measures and tests, the terminal can be used under extreme ambient conditions.

## Features

- Two relay outputs
- Floating connections for 2 actuators
- Nominal current of each output: 2 A
- Total current of the terminal: 4 A
- Segment voltage $U_{S}$ connected
- Diagnostic and status indicators
- Can be used under extreme ambient conditions
- Extended temperature range of $-40^{\circ} \mathrm{C} \ldots+70^{\circ} \mathrm{C}$ (see "Tested successfully: use under extreme ambient conditions")
- Painted PCBs

WARNING: Undefined system state
By default, the position of the relay contacts on the module is not defined. To prevent undesired system states, perform a complete cycle (on/off) before connecting the segment voltage.

This data sheet is only valid in association with the IL SYS INST UM E user manual.
i
Make sure you always use the latest documentation. It can be downloaded from the product at phoenixcontact.net/products.

## 4 Technical data

## Dimensions (nominal sizes in mm)

| Width | 12.2 mm |
| :--- | :--- |
| Height | 119.8 mm |
| Depth | 71.5 mm |
| Note on dimensions | Housing dimensions |

| General data |  |
| :---: | :---: |
| Color | green |
| Weight | 63 g (with connector) |
| Operating mode | Process data mode with 2 bits |
| Ambient temperature (operation) | $-25^{\circ} \mathrm{C} . .55^{\circ} \mathrm{C}$ (Standard) <br> $-40^{\circ} \mathrm{C} \ldots 70^{\circ} \mathrm{C}$ (Extended, see section "Tested successfully: use under extreme ambient conditions" in the data sheet.) |
| Ambient temperature (storage/transport) | $-40^{\circ} \mathrm{C} \ldots 85^{\circ} \mathrm{C}$ |
| Permissible humidity (operation) | 10 \% ... 95 \% (according to DIN EN 61131-2) |
| Permissible humidity (storage/transport) | 10 \% ... 95 \% (according to DIN EN 61131-2) |
| Air pressure (operation) | $70 \mathrm{kPa} \ldots 106 \mathrm{kPa}$ (up to 3000 m above sea level) |
| Air pressure (storage/transport) | $70 \mathrm{kPa} . . .106 \mathrm{kPa}$ (up to 3000 m above sea level) |
| Degree of protection | IP20 |
| Protection class | III, IEC 61140, EN 61140, VDE 0140-1 |
| Connection data |  |
| Designation | Inline connector |
| Connection method | Spring-cage connection |
| Conductor cross section solid / stranded | $0.08 \mathrm{~mm}^{2} \ldots 1.5 \mathrm{~mm}^{2} / 0.08 \mathrm{~mm}^{2} \ldots 1.5 \mathrm{~mm}^{2}$ |
| Conductor cross section [AWG] | $28 . .16$ |
| Stripping length | 8 mm |
| Interface Inline local bus |  |
| Connection method | Inline data jumper |
| Transmission speed | $500 \mathrm{kBit} / \mathrm{s}$ |
| Power consumption |  |
| Communications power $U_{L}$ | 7.5 V DC |
| Current consumption from $\mathrm{U}_{\mathrm{L}}$ | max. 30 mA |
| Power consumption | $0.23 \mathrm{~W}\left(\right.$ at $\left.\mathrm{U}_{\mathrm{L}}\right)$ |
| Relay output |  |
| Number of outputs | 2 |
| Connection method | Spring-cage connection |
| Connection method | Floating SPDT relay contact |
| Nominal output voltage | 48 V DC |
| Output voltage range | $\begin{aligned} & 5 \mathrm{~V} \text { AC ... } 30 \mathrm{~V} \text { AC } \\ & 5 \mathrm{~V} \text { DC ... } 60 \mathrm{~V} \text { DC } \end{aligned}$ |
| Maximum output current per channel | 2 A |
| Contact type | 2 floating PDT contacts |
| Contact material | $\mathrm{AgSnO}_{2}$, hard gold-plated |
| Contact resistance | $75 \mathrm{~m} \Omega$ |
| Switching voltage | min .10 mV (DC) <br> max. 30 V AC (PELV (EN 61131)) <br> max. 60 V DC (PELV (EN 61131)) |
| Switching current | $\begin{aligned} & \min .10 \mu \mathrm{~A} \\ & 2 \mathrm{~A}(30 \mathrm{~V} D) \\ & 1 \mathrm{~A}(60 \mathrm{~V}) \end{aligned}$ |
| Limiting continuous current | 2 A (at maximum ambient temperature) |
| Switching capacity | $\begin{aligned} & 60 \mathrm{~W} \\ & 62.5 \mathrm{VA} \text { (ohmic) } \end{aligned}$ |
| Switching frequency | 1 Hz (without load) ; 1 Hz (with load) |
| Nominal power consumption | 200 mW |

[^0]
## 5 Additional tables

5.1 Maximum switching current for ohmic load depending on the switching voltage

| Switching voltage (V DC) | Switching current (A) |
| :--- | :--- |
| 10 | 2.0 |
| 20 | 2.0 |
| 30 | 2.0 |
| 60 | 1.0 |

Load current $I_{L}$ as a function of the switching voltage $U_{S}$

1 DC, ohmic load
2 AC, ohmic load
Number of operations $\mathbf{N}$ as a function of the load current $\mathrm{I}_{\mathrm{L}}$

Figure 2 Number of operations N as a function of the load current $\mathrm{I}_{\mathrm{L}}$

130 V DC, ohmic load
2125 V AC, ohmic load

### 5.2 Power dissipation

Formula for calculating the power dissipation of the electronics
$P_{E L}=0,23 \mathrm{~W}+m \times 0,14 \mathrm{~W}+\sum_{i=1}^{n}\left(I_{L i}{ }^{2} \times 0,075\right)$

Where:
$\mathrm{P}_{\mathrm{EL}} \quad$ Total power dissipation in the terminal
i Continuous index
n Number of set outputs ( $\mathrm{n}=1 \ldots 2$ )
$\mathrm{m} \quad$ Number of relays with controlled coil
$\mathrm{I}_{\mathrm{Li}} \quad$ Load current of output i

Power dissipation of the housing
$\mathrm{P}_{\mathrm{HOU}}=1.2 \mathrm{~W} \quad-25^{\circ} \mathrm{C} \leq \mathrm{T}_{\mathrm{A}}<+25^{\circ} \mathrm{C}$
$\mathrm{P}_{\text {HOU }}=1.2 \mathrm{~W}-\left[\left(\mathrm{T}_{\mathrm{A}}-25^{\circ} \mathrm{C}\right) \times 0.02 \mathrm{~W} /{ }^{\circ} \mathrm{C}\right]$
$+25^{\circ} \mathrm{C}<\mathrm{T}_{\mathrm{A}} \leq+55^{\circ} \mathrm{C}$

Where:
$\mathrm{P}_{\mathrm{HOU}} \quad$ Power dissipation of the housing
$\mathrm{T}_{\mathrm{A}} \quad$ Ambient temperature
5.3 Limitation of simultaneity, derating

| Derating when using the $\mathrm{N} / \mathrm{O}$ contact |  |  |  |
| :--- | :--- | :--- | :--- |
| Ambient temperature $\mathrm{T}_{\text {amb }}$ | Power dissipation of the | Maximum load current |  |
|  | housing | $\mathbf{1 0 0} \%$ simultaneity | $\mathbf{5 0} \%$ simultaneity |
| $\leq 40^{\circ} \mathrm{C}$ | 0.9 W | 2.0 A | 2.0 A |
| $\leq 55^{\circ} \mathrm{C}$ | 0.6 W | 1.0 A | 2.0 A |

### 5.4 Air clearances and creepage distances

| Air clearances and creepage distances (according to EN |  |  | 50178, VDE 0109, VDE 0110) |
| :--- | :--- | :--- | :--- | :--- |
| Isolating distance | Clearance | Creepage distance | Test voltage |
| Relay contact/bus logic | $\geq 1.5 \mathrm{~mm}$ | $\geq 1.5 \mathrm{~mm}$ | $1.5 \mathrm{kV}, 50 \mathrm{~Hz}, 1 \mathrm{~min}$. |
| Contact/contact | $\geq 1.5 \mathrm{~mm}$ | $\geq 1.5 \mathrm{~mm}$ | $1.0 \mathrm{kV}, 50 \mathrm{~Hz}, 1 \mathrm{~min}$. |
| Contact $/ P \mathrm{PE}$ | $\geq 3.1 \mathrm{~mm}$ | $\geq 3.1 \mathrm{~mm}$ | $1.5 \mathrm{kV}, 50 \mathrm{~Hz}, 1 \mathrm{~min}$. |
| Relay $/$ relay | None |  |  |

## 6 Tested successfully: Use under extreme ambient conditions

XC terminals have been tested successfully over 250 temperature change cycles in accordance with IEC 61131-2 in the range from $-40^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$.
The following conditions were observed:

- The Inline devices for all connecting cables were connected with a minimum conductor cross section of $0.5 \mathrm{~mm}^{2}$
- The Inline station was assembled on a wall-mounted horizontal DIN rail
- Fans were used to ensure continuous movement of air in the control cabinet
- The Inline station was not exposed to vibration or shock
- The Inline station was operated with a maximum of 24.5 V (ensured by using regulated power supply units)

Figure 3 Temperature change cycle

Relay

Electrically isolated area
I/O area including relay contact isolated from the logic area including the relay coil

Explanation for other used symbols has been provided in the IL SYS INST UM E user manual.

## 8 Special features of the terminal

See also the information in the AH EN IB IL DOR application note.

### 8.1 Switching a voltage equal to the segment voltage

The potential $U_{S}$ is available at terminal points 1.1 and 1.2. If you insert a jumper between 1.1 and 1.3 or 2.1 and 2.3 , you connect the segment voltage potential to the main contact of the relevant relay and can therefore switch the connected load in a non-isolated manner.
If you do not insert a jumper, you can switch the load in a floating manner.

### 8.2 Switching a voltage unequal to the segment voltage

## Different DC voltages

Distance terminals are not required.
Only floating switching of the load is permitted. Do not, therefore, attach any jumpers to the connector.

If the switch contact potentials and the segment circuit potential are two different DC circuits, Phoenix Contact recommends establishing a ground connection between the two power supply units.

## Switching an AC voltage within a DC segment circuit

Place distance terminals in front of and behind the relay terminal block.
The distance terminals interrupt the potential jumpers. As a result, no segment voltage is present at terminal points 1.1 and 2.1. It is only possible to switch the connected load in a floating manner.

9 Local status and diagnostic indicators

Figure 5 Local status and diagnostic indicators

| Designa- <br> tion | Color | Meaning |
| :--- | :--- | :--- |
| D | Green | Diagnostics (bus and logic volt- <br> age) |
| $1 \ldots 2$ | Yellow | Status of the outputs (relay has <br> picked up) |

## Function identification

Pink
Housing/connector color
Green housing
Green, unprinted connector

## 10 Terminal point assignment

Figure 6 Terminal point assignment

| Terminal point | Assignment |  |
| :--- | :--- | :--- |
| $1.1 / 2.1$ | Segment voltage U |  |
| S |  |  |
| 1.2 | Relay N/C contact | Relay 1 |
| 1.3 | Relay main contact | Relay 1 |
| 1.4 | Relay N/O contact | Relay 1 |
| 2.2 | Relay N/C contact | Relay 2 |
| 2.3 | Relay main contact | Relay 2 |
| 2.4 | Relay N/O contact | Relay 2 |

## 11 Connection notes and examples

## NOTE: Damage to the electronics

Use the terminal within the PELV range (EN 61131) up to a maximum of 30 V AC or 60 V DC.
