

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## IL CAN BK-TC-PAC

Order No.: 2718701

<http://eshop.phoenixcontact.de/phoenix/treeViewClick.do?UID=2718701>

CANopen bus coupler, 24 V DC, bus interface 2 x 5-pos. TWIN-COMBICON connector, complete with accessories (connector and labeling field)

**CANopen**

Please note that the data given here has been taken from the online catalog. For comprehensive information and data, please refer to the user documentation. The General Terms and Conditions of Use apply to Internet downloads.

### Commercial data

GTIN (EAN)	 4 017918 891237
sales group	K410
Pack	1 pcs.
Customs tariff	85389091
Catalog page information	Page 259 (AX-2009)

### Product description

The CANopen fieldbus coupler enables the flexible INTERBUS Inline automation kit to be operated in CANopen networks as well. The fieldbus coupler allows an INTERBUS Inline station to be inserted at any point in a CANopen network. The fieldbus coupler is a slave in the CANopen network and a master in the lower-level INTERBUS Inline local bus.

The address of the CANopen slave can easily be set via DIP switches from outside. The CANopen network is connected via a Twin Combicon connector. The operating voltage for the fieldbus coupler and the electronics can be fed using a separate power connector.

For the CANopen project planning, a regularly updated EDS file (Electronica Data Sheet) is provided in the Product Information Service (see below). The CANopen fieldbus coupler supports the proven INTERBUS Inline diagnostics as well as the typical diagnostics objects for CANopen. Local LEDs enable precise diagnostics.

Please note the following when you configure the system:

The total logic current of all terminals connected to a CANopen network must not exceed the maximum permissible total current of 2 A. Therefore, depending on your configuration, the number of terminal blocks that you can connect may be less than 63.

## Technical data

### General data

Width	85 mm
Height	119.8 mm
Depth	71.5 mm
Weight	240 g
Note on weight specifications	with male connectors
Mounting type	DIN rail
Ambient temperature (operation)	-25 °C ... 55 °C
Ambient temperature (storage/transport)	-45 °C ... 85 °C
Permissible humidity (operation)	95 % (no condensation)
Permissible humidity (storage/transport)	95 % (no condensation)
Air pressure (operation)	80 kPa ... 106 kPa (up to 3000 m above sea level)
Air pressure (storage/transport)	70 kPa ... 106 kPa (up to 3000 m above sea level)
Degree of protection	IP20
Test section	CANopen/local bus 500 V

### Interface

Fieldbus system	Lokalbus
Name	Inline local bus
Type of connection	Inline data jumper
Transmission speed	500 kBaud
Fieldbus system	CANopen
Name	CANopen
Type of connection	2x 5-pos. TWIN-COMBICON connectors
Transmission speed	1 MBaud, 500 kBaud, 250 kBaud, 125 kBaud, 50 kBaud, 20 kBaud, 10 kBaud (Can be set via DIP switch or programmed)
Address area assignment	0 ... 63, can be set
Name	Supply
Type of connection	8-pos. Inline connector

### Power supply for module electronics

Supply voltage	24 V DC
Supply voltage range	19.2 V DC ... 30 V DC

Current consumption	max. 1.25 A (from U <sub>BK</sub> )
<b>Inline potential routing</b>	
Communications power U <sub>L</sub>	7.5 V DC ±5%
Power supply at U <sub>L</sub>	max. 2 A DC
Main circuit supply U <sub>M</sub>	24 V DC -15% / +20% (in acc. with EN 61131-2)
Power supply at U <sub>M</sub>	max. 8 A DC (Sum of U <sub>M</sub> + U <sub>S</sub> )
Segment supply voltage U <sub>S</sub>	24 V DC -15% / +20% (in acc. with EN 61131-2)
Power supply at U <sub>S</sub>	max. 8 A DC (Sum of U <sub>M</sub> + U <sub>S</sub> )
I/O supply voltage U <sub>ANA</sub>	24 V DC -15% / +20%
Power supply at U <sub>ANA</sub>	max. 0.5 A DC

### Certificates / Approvals

Certification	CUL, GOST, UL
Certification Ex:	CUL-EX LIS, UL-EX LIS

### Accessories

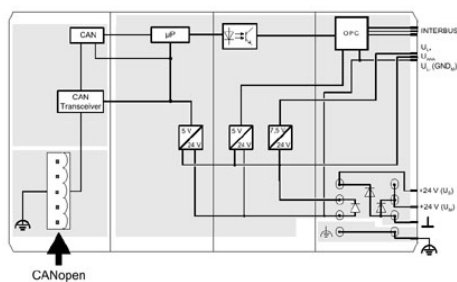

Item	Designation	Description
<b>Assembly</b>		
3022218	CLIPFIX 35	Snap-on end bracket, for 35 mm NS 35/7.5 or NS 35/15 DIN rail, can be fitted with Zack strip ZB 8 and ZB 8/27, terminal strip marker KLM 2 and KLM, width: 9.5 mm, color: gray
<b>Marking</b>		
0809492	ESL 62X10	Insert strip for laser printer, lettering field: 62 x 10 mm
2727501	IB IL FIELD 2	Labeling field, width: 12.2 mm
<b>Plug/Adapter</b>		
2727608	IB IL SCN-8-CP	Inline connector, colored

## FAQs

### • How does the autoconfiguration function on the IL CAN BK-TC bus coupler?

The autoconfiguration function allows the bus coupler to be configured in the field without any software. The default settings with this function are:

- The receive PDO 1 maps the digital outputs 1 to 64. If fewer digital outputs are connected, fewer are mapped.
- The transmit PDO 1 contains the digital inputs 1 to 64. If fewer digital inputs are connected, fewer are mapped.
- The receive PDO 2 contains analog outputs 1 to 4, if they are available.
- The receive PDO 2 contains analog inputs 1 to 4, if they are available.
- The receive PDO 3 contains analog outputs 5 to 8, if they are available.
- The transmit PDO 3 contains analog inputs 5 to 8, if they are available.
- The receive PDO 4 contains analog outputs 9 to 12, if they are available.
- The transmit PDO 4 contains analog inputs 9 to 12, if they are available.
- All other I/O modules, such as function modules, must be configured manually. To use the autoconfiguration function, proceed as follows:
  - Set all the DIP switches for the address setting (1-7) to "0".
  - Switch the supply voltage of the bus coupler UL off and back on again after the desired I/O modules have been

connected. The "RUN" LED is green and stops flashing when the station has saved the local bus configuration in the memory. The bus coupler does not go "online" on the fieldbus as long as the address is set to "00 00 00 0". 3. Switch off power supply UL. 4. Set the address and baudrate. 5. Switch power supply UL back on.

- **What is the switch position of the CANopen fieldbus coupler when it is delivered?**

The CANopen fieldbus coupler is supplied with the address 1 and a baudrate of 20 k. (Switch 1,9 = On; all others Off).
