Connection Notes

Meet noise immunity requirements

Connect FE using a mounting screw or a cable connection to the FE connection latch (when mounting on a non-conductive surface).

Ensure degree of protection

To ensure IP65/IP67 protection, cover unused sockets with protective caps.

Avoid damage to the electronics

Make sure you only supply the sensors with the voltage U_S provided at the connection points.

Avoid polarity reversal

Avoid polarity reversal of the supply voltages U_L , U_S , and U_A in order to prevent damage to the device.

Observe connection point assignment

When connecting the sensors and actuators, observe the assignment of the connection points to the IN and OUT process data (see "Process Data" on page 8).
