# Short Feather Headers Kit – 12-pin and 16-pin Female Header Set

PRODUCT ID: 2940

---

## DESCRIPTION

These two Short Female Headers alone are, well, lonely. But pair them with any of our Feather boards and you're in business!

These headers are particularly cute and tiny with a body height of just 5.0 mm they are the best way to minimize the amount of space your Feather project takes up, but still maintain that flexible configuration. "Normal" socket headers have an 8.5mm body height so this saves you a whole 3.5mm (hey it adds up!) For ultimate skinniness, you may need to cut the male headers on your Featherwings down by a few mm.

What do they do? They get soldered on either side of the Feather board. Now you can plug in FeatherWings to add more capability to your portable project. Unlike our Feather Stacking Headers, they aren't designed to 'stack', but they're way more compact.

Check out all of our Feather boards, FeatherWings, and Feather accessories here!

Note: Comes with one 12-pin and one 16-pin header, Feathers not included
