

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Electron Cellular IoT Kit - 2G Global

PRODUCT ID: 3233

. Description

The Electron is a small cellular IoT board made by Particle. This tiny development kit has everything you need for creating **2G** cellular connected products. Includes a prepaid, no contract data plan and instant web access to your Electron with wireless programming.

Kit includes:

- Microcontroller
- Particle SIM card with service in more than 100 countries worldwide
- 3 months of Particle's 1MB monthly data plan (delivered by email)
- Antenna x 1
- 2000mAh battery x 1
- USB cable x 1
- Half-size breadboard x 1

The Electron kit also includes Particle's development tools and access to a cloud platform for managing and updating your new connected hardware.

GSM 850/900/1800/1900 MHz for use in all regions of the World.

Please note that the Electron is a GSM-only device, and does not support CDMA networks. Many global carriers are planning to sunset their 2G networks beginning as soon as late 2016 and early 2017, so please confirm continued 2G service with your local carrier. We recommend 3G Electrons for anyone concerned about long-term cellular support in their home country. 2G Electrons will not work in Japan, where 2G networks have already been discontinued.

3G Americas/Aus version also available.

• Technical Details

Specs:

- STM32F205 ARM Cortex M3 microcontroller
- 1MB Flash, 128K RAM
- Cellular modem: U-Blox SARA G-series (2G)
- 36 pins total: 28 GPIOs (D0-D13, A0-A13), plus TX/RX, 2 GNDs, VIN, VBAT, WKP, 3V3, RST
- Board dimensions: 2.0" x 0.8" x 0.3" (0.5" including headers)
