## Work @ Height Tools

## Why is it important?

In private industry, falling objects accounted for 10\% of worker fatalities in 2013 and are the third leading cause of disabling workplace injuries. In 2012, falling objects caused 18\% of contractor deaths, a $7 \%$ increase from 2011.

OSHA ranks being "struck by objects" as the third leading cause of disabling workplace injuries.
Klein Tools' growing line of tethers and tools for Work@Height are designed to protect workers on the job site as well as their tools.

## Tool Tether
