

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

FSLP Sensor Data Sheet

Force Sensing Linear Potentiometer

FLSP Sensor for Position and Force Applications

Features and Benefits

- Rugged design - Over 1M touch activations over entire sensor area with no degradation observed
- Measures position and pressure simultaneously
- Easy to integrate
- Low power consumption

Description

The Force Sensing Linear Potentiometer (FSLP) Sensor is Interlink's solution for capturing position and force simultaneously in compact applications. The sensor's tough, moisture resistant surface can be used with a finger, stylus, or glove; even in harsh environments.

The Force Sensing Linear Potentiometer (FSLP) simplifies input design, saves critical room, and helps save battery life. A battery operated demo is available. Call us for more information at +1 805-484-8855

FSLP Sensor Data Sheet

Force Sensing Linear Potentiometer

FLSP Sensor for Position and Force Applications

Device Characteristics

Actuation Force*	~0.2N min
Force Sensitivity Range*	~0.2N – 20N
Force Resolution	Continuous (analog)
Force Repeatability Single Part	+/- 2%
Force Repeatability Part to Part	+/-6% (Single Batch)
Non-Actuated Resistance	>10 Mohms
Hysteresis**	+10% Average (RF+ - RF-)/RF+
Device Rise Time	<3 microseconds
Long Term Drift**	
1kg load, 35 days	< 5% log 10(time)
Operating Temperature Performance**	
Cold: -40°C after 1 hour	-5% average resistance change
Hot: +85°C after 1 hour	-15% average resistance change
Hot Humid: +85°C 95RH after 1 hour	+10% average resistance change
Storage Temperature Performance**	
Cold: -25°C after 120 hours	-10% average resistance change
Hot: +85°C after 120 hours	-5% average resistance change
Hot Humid: +85°C 95RH after 240 hours	+30% average resistance change
Tap Durability	
1 Million actuations, 500g, 4Hz Ø 1.2mm Derlin Stylus	Fully functional during and after durability testing
Standing Load Durability**	
2.5kg for 24 hours	-5% average resistance change
Linearity	Voltage on sense line is proportional to actuation position to within +/-3% over active area.
EMI	Generates no EMI
ESD	Not ESD sensitive
UL	All materials UL grade 94 V-1 or better
RoHS	Compliant

Specifications are derived from measurements taken at 1000 grams, and are given as (one standard deviation/mean), unless otherwise noted.

* Typical value. Force dependent on actuation interface, mechanics, and measurement electronics.

** Performance values are for the force sensing portion of the sensor. The position sensing component is minimally affected by environmental and durability factors.

Connector Information

Recommended tail connector:
JST 4-pin SMT connector
(JST PN# 04-FM-1.0SP-1.9-TF)
or equivalent for FFC option.

Female Tin Contacts:
PN: TE 2-487-7406-4

Solder Tabs
PN: TE 1-88997-2

Female Tin Contacts with 3
Pin Housing
PN: TE 2-487406-4
PN: TE 2-487378-2

Application Information

The Interlink Electronics FSLP Sensor can measure position and pressure. The connection to the measuring microprocessor is very simple and requires only one external component. The microprocessor will need two general purpose IO (GPIO) pins and two GPIO/analog-to-digital converter (ADC) pins. The GPIOs should be able to go into high-impedance mode ($>1M\Omega$) and the ADCs should be able to measure from 0 to V_{cc} .

PINOUT		
STANDARD FSLP	10 cm FSLP	
PIN #	PIN #	REFERENCE
1	3	SENSE LINE (SL)
2	1	DRIVE LINE 1 (D1)
3	2	DRIVE LINE 2 (D2)
4	4	NOT CONNECTED (NC)

Orderable Part Numbers

Hardware Development Kit, 54-00019

This Hardware Development Kit includes:

- FSLP Demo Board (Qty. 1)
- FSLP Sensor (Qty. 10)
- FSLP 10cm Sensor (Qty. 10)
- 4-Pin Connector (Qty. 5)
- USB Flash drive with product literature (Qty. 1)

FLSP 10cm Sensor with Solder Tabs, PN 34-00022

FLSP 10cm Sensor with Female Contacts, PN 34-00023

FLSP 10cm Sensor 4-Pin Tail, PN 34-00034

FLSP 10cm Sensor with Female Contacts & Housing, PN 34-00025
