

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

3M™ Locator Plate 3443-107N

Instructions for the assembly of .100" x .100" preassembled socket connectors

1.0 General

The 3M Locator Plate 3443-107N is designed to aid in the assembly of the preassembled socket connector family for all positions. End-to-end as well as daisy chain length (min daisy chain length ± 45 mm). Set-up and assembly instructions are based on termination procedures with 3M manual and pneumatic presses.

Locator plate includes:

- Instruction sheet
- 3 mounting screws
- 1 M571x26 Hex Key
- 1 SW 2.5 56x18 Hex Key

Figure 1

2.0 Tool Preparation

- 2.1 Mount lever ① on the guiding wing ② and secure by locking screw ③. Make sure that the plastic ball is facing towards the operator (see Figure 2).
- 2.2 Remove the platen from the assembly press. Adjust shut height to 17 for the 3M™ Assembly Press 3640, or to 17½ for presses the 3M™ Assembly Presses 3335 and 3316 using shut height gauge 3436-1B. The the 3M™ Assembly Press 3830 shut height is self-adjusting.
- 2.3 Place the locator plate on the press and fasten it with the two locking screws, that are included.

Note: *If the optional 3M™ Staging Platform (part number 3767-0005) is used, please refer to its own instruction sheet for mounting.*

Figure 2

3.0 Assembly Procedure

- 3.1 Cut cable to the required length.
- 3.2 Loosen the left cable guide screw ④. Lift the guiding wing ② and slide the left cable guide ④ into the required position depending on the connector size to be used. Connector pole sizes are indicated on the guiding wing ②. Lower the guiding wing ② and make sure that the serrations of the base plate ⑤ and cable guide ④ are fully aligned. Tighten the cable guide locking screw.
- 3.3 Insert the appropriate cable ⑩ under guiding wing ② and adjust the right cable guide ⑥. Make sure that the base plate ⑤ and cable guide ⑥ serrations are aligned and that the right cable guide ⑥ is as close as possible to the cable ⑩.
- 3.4 Adjust the cable stop as required (see Figure 1). For daisy chain assemblies: left position ⑧. For end-to-end assemblies: right position ⑨.
- 3.5 Install the proper platen (3442-9) onto the press.
- 3.6 Remove the connector from the packing strip cover down, IDCs facing down towards the plate.

- 3.7 Slide the connector into the guiding groove against the connector locator stop ⑦.
- 3.8 Place the cable ⑩ into the base plate serrations. For end-to-end assemblies, smoothly slide the cable between cable guides ④ ⑥, under the guiding wing ② against cable stop ⑨. For daisy chain assemblies, until the required length is obtained. The cable will fit between the cover and the contacts of the connector.

Note: If the cable is not entering into the connector smoothly, check the flatness of the cable used.

- 3.9 Complete the assembly by closing the press handle.

Note: Never operate a pneumatic press without ensuring that there is a connector in the locator plate.

- 3.10 Raise the press handle and remove the finished assembly by lifting the guiding wing ② with the lever ①.
- 3.11 Visually inspect to ensure that:
 - a) The cover is fully locked. If not, check the shut height gauge.
 - b) The cable is correctly aligned in the cover. If not, check the cable guide adjustment.
