

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# 3M™ Locator Plate 3443-112

## 3M™ Platens 3442-44, 3442-9

### Instructions for the assembly of 3M™ D Sub Connectors 8250 and 8350

#### 1.0 General

3M manual and pneumatic assembly presses and accessory assembly equipment are recommended for the termination of 3M™ D Sub Connectors. 3M assembly equipment is offered to help reduce set-up time, to provide easier and faster assembly and to help reduce assembly error. The 3M Locator Plate 3443-112 and 3M Platen 3442-44 were designed to assemble the D Sub Connector 8250. The Locator Plate 3443-112 is used with the 3M™ Platen 3442-9 to assemble the D Sub Connector 8350.

| Connector Part Number | Locator Plate Number | Platen Part Number | 3436-1F Shut Height Setting   |                                 | Assembly Press |
|-----------------------|----------------------|--------------------|-------------------------------|---------------------------------|----------------|
|                       |                      |                    | Assembly Presses<br>3640/3316 | Assembly Presses<br>3335/3339-1 |                |
| 8250                  | *3443-112            | 3442-44            | 15                            | 15 1/2                          | 3830           |
| 8350                  | *3443-112            | 3442-9             | 20                            | 20 1/2                          | 3830           |

\*Included with the Locator Plate 3443-112 is a Platen 3442-44. The Platen 3442-44 can also be purchased separately.

## 2.0 Procedures for Set Up:

2.1 Adjust the shut height setting (see Figures 2 through 4).

Figure 1: 3M™ Locator Plate 3443-112

## 3.0 Procedures for Adjusting Shut Height

3.1 The shut height should be adjusted from the base before the locator plate is put into place. The 3M™ Assembly Presses 3316 and 3640 are adjusted with a knob at the top of the press. The 3M™ Assembly Press 3335 is adjusted with the collar on the press shaft, and the 3M™ Assembly Press 3830 is self-adjusting.

3.2 The shut height adjustment is made from the base of the assembly press without the locator plate or platen in place.

3.3 Place the shut height gauge across the assembly press base. (See Figures 2 and 3)

Figure 2: Shut Height Adjustment

3.4 Lower the handle of the assembly press until the handle casting makes contact with the press casting.

3.5 Rotate the shut height to lower or raise adjustment feature until the bottom of the shaft contacts the desired position on the shut height gauge. (See Figures 3 and 4)

Figure 3: 3M™ Assembly Press 3640

- 3.6 Install the 3M™ Locator Plate and the appropriate platen on the assembly press. The platen should be positioned parallel with the connector body and cover.

*Note: See the chart on page 1 for shut height settings.*

Figure 4: 3M™ Assembly Press 3335

## 4.0 Procedures for Adjusting Shut Height

- 4.1 Grasp a 3M™ D Sub Connector cover strip between the thumb and forefinger of both hands, with the liner facing you. Rotate the outermost cover down against the adjacent cover on the strip, breaking it from the liner. Pull laterally away from the strip. Adhesive should be present on cover. (See Figure 5)

Figure 5

- 4.2 Firmly press the ribbed side of the cable into alignment grooves on cover. The adhesive will help the cable stay in place. Visually inspect to ensure that:
- Cable is properly aligned to cover grooves.
  - Cable end is flush with the cover for end terminations or perpendicular to cover for midspan terminations. (See Figure 6)

Figure 6

- 4.3 Place the cable/cover sub assembly between the guides on the locator plate, cover side down. (See Figure 7)
- 4.4 Position and orient connector body, contacts down, over the cable/cover sub-assembly, aligning with the body. (See Figure 7)

Figure 7

- 4.5 Lower the ASSEMBLY PRESS HANDLE firmly to complete the Cable/Connector Assembly. (See Figure 8.)
- 4.6 Raise the press handle and remove the completed assembly. Visually inspect to ensure that:
  - a. Cover is fully seated and parallel with the body.
  - b. Cable is properly aligned with the cover grooves.
  - c. Cover retaining devices on the body are flush with the cover end.

Figure 8
