inspired LED

Mini TV Backlight Kit

with USB Switch

New
Improved
Design!

The frequent and sometimes dramatic variation in picture brightness from your television screen can cause visual fatigue in an otherwise dark room. The new **Mini TV Backlight Kit** from Inspired LED provides adequate bias light to reduce eyestrain, making your television display seem crisper and the colors appear more vivid. Best of all, the **USB Connector** allows you to turn the lights on and off in sync with your television!

SKU#: 3668

Mini USB Backlight Kit Includes:

- (1) 36" Strip Normal Bright Cool White LEDs (6000K)
- (1) 1 Amp Power Supply (12VDC)

- (1) USB Switch & USB Cable
- (1) 2' Cable
- (1) 4-pack cable clamps

Instructions:

1 Beginning near power button, line up LED strip along back side of television, using small pieces of tape to secure in place during installation (*Note: do not cover any ventilation holes as this could hinder the performance of your TV*)

2 Measure desired length of strip, cut along copper pads (located every 3 LEDs) to remove excess

3 Plug cable from end of LEDs into side of USB switch, using cable clamps to hold back excess length.

**If upgrading to dimmer: plug 2' LED cable directly into dimmer port marked LED, then connect 4" cable from port marked PWR into USB switch*

4 Run USB cable from USB switch to TV USB input and secure in place

5 Plug in power supply and test connections, then remove adhesive backing from LED strip and secure in place
