Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Accessory connection with stranded cable for KE, CE and KG, CG (wiring of voltage selector)

The connection with stranded cable has to be mounted by customer. Stand $=1,5 \mathrm{~mm}$

Attention:
To guarantee the minimum air and creeping distances, use taps only for terminal
3/4 or N for KE, CE
2/3/4 or N for KG, CG
(concerns voltage selector system 1, 2 and 3).

## Insulating cover

The terminals of the Schurter appliance couplers can be protected against unintentional contact by the use of an insulation cover.

They are made of flexible thermoplastic (UL 94V-0, black) and can be easily mounted from the rear to the corresponding appliance couplers.

## Cord retaining kits

For protection against loosening or accidental disconnection of the plug connector. Can also be mounted later.

The correct kit type (A-M) for each combination of fixed and free components is shown in the selection chart on page 172.
The corresponding Order No. for each kit type is shown in the smaller chart.
Horizontal flanged components are secured to the panel using the kit supplied. Vertical flanged or snap-in components require additional drilling for the cord retaining kit as shown in the diagrams below.

Each cord retaining kit consists of:
1 Stainless steel retaining clip
2 Nickel plated brass pillars
2 Nickel plated brass nuts
2 Nickel plated beryllium copper crinkle washers
