

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

DESCRIPTION

DATEL's 4320-01069-0 six position connector housings and 4400-01032-0 crimp terminals provide a secure method for making input/output connections to all panel mounted 12-pin DMS series meters. These connectors are ideal for use in low-volume prototype applications. Two connector housings and 12 terminals are required for each meter.

6-Position Connector Housing

Connector Housing	A	B	C

DESCRIPTION

DATEL's 6-position SIP and 12-position DIP sockets provide any easy and inexpensive, low profile solution for mounting DMS series meters on printed circuit boards. These are the same rugged, long-life sockets DATEL uses in all its in-house panel meter burn-in boards. Both sockets provide excellent mechanical retention force, and in many applications they can supply all the necessary mechanical force to hold the meters in position (see DMS Application Note 16 for more information). The 6-position SIP's can be used with all 12-pin DMS meters, while the 12-position DIP's are intended for use with "-BCD" models of the DMS-40PC family.

6-Position SIP Sockets
