

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

circuit breakers

Thermal Circuit Breaker, rotary knob actuation, 1-, 2- or 3-pole

NEW

2-pole standard version

3-pole type without front bezel/knob

standard front bezel/knob

**Description**

- Thermal circuit breaker 1-, 2- or 3-pole
- Supplementary protector for general industrial use
- Positively trip-free release
- Bezel/knob snap-on
- Easy actuation with gloves
- Available without bezel/knob for customized front panel design

Applications

- Floor cleaning equipment
- Power tools
- Wood and stone working machines
- Equipment for building construction
- Industrial equipment

Standards

- IEC 60934
- UL 1077
- CSA C22.2 235
- GB 17701

Tripping Characteristics

The above tripping characteristics apply to symmetrical overloads on all poles on the TA35 only.

At asymmetric overloads on multi-pole types, the tripping characteristic will change.

- If a 2-pole type TA35 is loaded at one pole only, the tripping current will be shifted by factor **1.05** (TC-2).
- If a 3-pole type TA35 is loaded at one pole only, the tripping current will be shifted by factor **1.10** (TC-2).

To meet the above tripping characteristic at asymmetric overloads on multi-pole types, the value of the rated current of the CBE has to be multiplied by the factor mentioned above.

Effect of ambient temperature

The unit is calibrated for an ambient temperature of +23 °C. To determine the rated current for lower or higher ambient temperature, use a correction factor from the table below.

Ambient temperature [°C]	Correction factor 1-pole	2-pole	3-pole
-30	0.77	0.76	0.76
-20	0.81	0.81	0.81
0	0.90	0.90	0.90
+23	1.00	1.00	1.00
+40	1.03	1.03	1.06
+50	1.04	1.04	1.10
+60	1.06	1.06	1.14

Example for 2-pole type:

Rated current at +23 °C 5.0 A
Ambient temperature +50 °C
Correction factor 1.04
Chosen rated current at +40 °C ambient temperature: **5 A x 1.04 = 5.2 A**
