

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

EL WIRE/TAPE/PANEL / INVERTERS

12V EL wire/tape inverter PRODUCT ID: 448

DESCRIPTION –

This is an inverter for EL wire and tape, similar to our pocket inverters, except it is a brick that takes 12V input instead of 2 AA batteries. This means its good for 'fixed' installations since you can just plug it into a 12V wall adapter. It's also good for portable projects where you want to have a big battery pack like a 8xAA holder which will last 4–5 times longer than just 2xAA's. It is also more powerful, and can drive twice as much EL as the 2xAA inverter! Another nice thing about this inverter is it's a potted brick, so its quieter than the 'open' inverters with a switch.

It's got twice the power of the 2xAA pocket inverter, you can drive up to 6 meters combined of our high brightness EL wire (20 feet), or 12 meters (40 feet) of plain EL, or up to 100 square centimeters combined of panel/tape – so either a 10x10cm square or 1 meter of 1 cm wide tape.
