

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# Get The Clear Picture on VS1 Series Splitters

## Designed for Bandwidths up to 1 GigaHertz

The new VS1 GigaHertz RF splitters from Greenlee are designed for digital broadcast television, digital cable television, off-air antennas and RF distribution. Internal impedance matching distributes 75-ohms evenly to all outputs for maximum signal strength and a vivid picture. DC passive to one port, the VS1 is compatible for devices

requiring DC power, such as amplified antennas and DBS dishes. Printed circuit board construction provides precise signal transfer and minimal insertion loss. Nickel-plated, zinc die-cast housing with precision, machined ports ensure 120dB isolation against RF leakage. Complete with mounting hardware.

## PRODUCT FEATURES

- **Bandwidth** - 5 MHz to 1 GHz.
- **Power Passive Port** - designed to pass RF and DC power from one input to one output.
- **Nickel-plated, zinc die-cast housing** for excellent anti-corrosive protection.
- **100% solder-sealed tin backplate** provides EMI/RFI shielding > -120dB.
- **Low insertion loss.**
- **Printed circuit board construction** ensures consistent RF performance and excellent port-to-port isolation.
- **Precision machine threaded "F" ports** for perfect connector fit.
- **F-Ports spaced at 1" on center** to allow application of security sleeves and window filters.
- **F-Ports comply** with SCTE outdoor standards.

### ACCESSORIES

Mounting screws included

We recommend the use of Greenlee #45326 75-Ohm terminators on all signal outputs of a splitter that are not connected to a television or VCR. Un-terminated outputs are known to diminish performance of the video system by causing a 'herringbone' pattern (those slow moving, wavy lines that drive you crazy) on some channels of the other sets connected to the splitter.
