

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Address: A1208, Overseas Decoration Building, #122 Zhenhua RD., Futian, Shenzhen, China

Features

- Low noise termination for CMOS
- Combined resistors and capacitors in SIP package saves space
- Reduced insertion time
- Insulation resistance testing for reliability
- Pin counts from 4 to 16 available
- RoHS compliant*

For information on RC Terminators, download Bourns' RC Terminator Networks Application Note.

Governing dimensions are metric. Dimensions in parentheses are inches and are approximate.

 $^{\star\star}\text{Terminal}$ centerline to centerline measurements made at point of emergence of the lead from the body.

Typical Part Marking

***See Standard Marking, Values and Codes tables.

^{*}RoHS Directive 2002/95/EC Jan. 27, 2003 including annex and RoHS Recast 2011/65/EU June 8, 2011. Specifications are subject to change without notice.

The device characteristics and parameters in this data sheet can and do vary in different applications and actual device performance may vary over time. Users should verify actual device performance in their specific applications.

Additional Features

- Prevents bus lines and control signals from floating to undefined logic levels.
- Optimizes signal transmission in high performance systems through proper termination.
- Eliminates overshoot and ringing, increases noise immunity, minimizes signal distortion, and lowers EMI/RFI radiation.
- Minimizes space and routing problems, and reduces manufacturing cost per installed resistive function.
- Increases board yields and reliability by reducing component count.
