Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

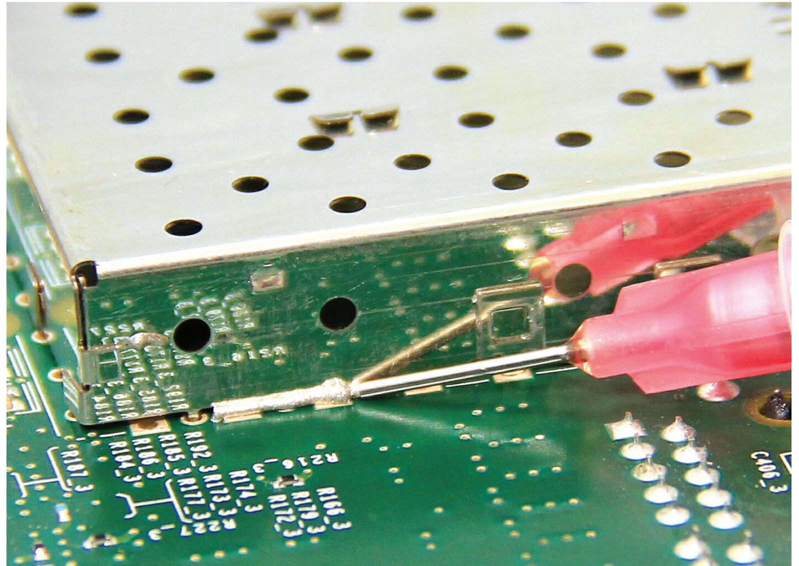
CHO-BOND® 584-29

TWO COMPONENT EASY TO USE CONDUCTIVE EPOXY ADHESIVE



Customer Value Proposition:

CHO-BOND 584-29 is a two-component, silver filled conductive epoxy adhesive system designed for applications where a strong, highly conductive electrical bond must be achieved. CHO-BOND 584-29 is recommended for relatively small bond lines (less than 0.010 inches (0.25mm)), but can be used for larger bond lines in applications where vibration or potential for cracking is not an issue. The fine silver filler of CHO-BOND 584-29 make it a good material choice for precise application in and around tight spaces and electrical components. CHO-BOND 584-29 comes in a variety of sizes and packaging so customers can choose a package and material size which is right for their application, minimizing material scrap and mixing issues.

Curing of CHO-BOND 584-29 can be achieved in as little as 15 minutes with heat to minimize equipment downtime and increase manufacturing throughput. Typical applications include bonding and grounding of electrical components, cold soldering, and bonding and sealing machined enclosures.

Features and Benefits:

Feature	Benefit
• Two component	• Fast heat cure, increases throughput, minimizes equipment downtime.
• Silver filler	• Excellent conductivity 0.002 ohm-cm
• Epoxy	• 30 minute working life, works well over wide temperature range, good chemical resistance >1200 psi lap shear, good for permanently bonding surfaces.
• Multiple packaging options	• No weighing required, mix and dispense in same package, minimizes process scrap.
• Thin paste	• May be dispensed out of very small needles, fill small cracks and voids.
• Low VOCs	• Minimal shrinkage
