

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

TONER TRANSFER PAPER

MASTER REFERENCE OF ALL "PULSAR" PRODUCTS:

| | |
|-------------------------------|--|
| PCB "Fab-In-A-Box" | 182-1027-ND |
| - TTS Transfer Paper | 182-1003-ND (Shown Here) |
| - GreenTRF film | 182-1021-ND |
| - WhiteTRF film | 182-1022-ND |
| - PCB (Single Sided) | 182-1017-ND |
| - PCB (Double Sided) | 182-1018-ND |
| DecalPRO® | 182-1026-ND |
| "Combo" (both kits) | 182-1028-ND |
| GBC® Laminator ("TIA") | 182-1029-ND |

Toner Transfer Paper, or TTS for short is the basis by which to capture the "graphic" out of the laser printer (or photo-copier) to be able to transfer the image for making printed circuit boards or dry transfer graphics.

The paper is coated with a thin layer of Dextrin which is a water-soluble glue that acts as a barrier between the printed image and the fibers of the paper. Because there is an invisible barrier it means we have a way to release the image by merely wetting the paper. However, if the image is not secured to something first, the image will slide off the paper and break up in to a million little pieces (or particles) of toner.

The technique is very simple. All you need is a laser printer or photo-copier, a house-hold iron and and a couple of inexpensive supply items and you can crank out quality PCB's with traces as fine as .006" on boards up to 8" x 10" in just minutes. For single and double-sided boards.

For PCB's, Decals, Tattoos and more!

21 Carriage Drive - Crawfordville, FL (USA) 32327-2496
PH: (850) 926-2009 (9-5pm EST) • FAX: (850) 926-8866

This "TTS" image transferring medium is produced in the USA by Pulsar. Package Contents: 10 sheets, 8-1/2" x 11".

NOTE: This product is intended to be used with "toner" printing devices (laser printer or a photo-copier). It is not intended for use in inkjet printers.

6 58210 01101 1

Package Contents:

- 10 sheets, 8-1/2" x 11"
- Coated 1-side.

Safe for ALL laser printers and photo-copiers!
