Avoid cross contamination with our new touch free dispenser.

Introducing Staticide® #5050 Touch Free Dispenser

ACL, Inc., an ISO 9002 registered company, has introduced the Touch Free Lotion/Soap Dispenser that eliminates direct skin contact and increases hygiene control. Users simply place their hands under the unit. Lotion or soap is dispensed automatically, and the risk of cross contamination is avoided.

This patent pending dispenser utilizes infrared technology to neatly dispense a perfectly portioned amount of lotion or soap. And it does so safely, cleanly and economically.

The Touch Free Lotion/Soap Dispenser is perfect for electronic clean room environments, pharmaceutical inspection areas, hospitals, laboratories, food processing facilities--any environment where cross contamination is possible.

Also available from ACL:

Staticide #5055 Anti-Bacterial Static Dissipative Soap and Staticide #5060 Instant Hand Sanitizer.

Staticide #5055 Anti-Bacterial Static Dissipative Soap is specially formulated with .3% Triclosan, natural moisturizers, and proprietary additives. This helps to kill gram-positive and gram-negative bacteria, as well as clean and moisturize the skin to protect against static. Packaged six per case.

Staticide #5060 Instant Hand Sanitizer provides excellent antiseptic and sanitization without the use of water or towels. It contains 60% ethyl alcohol to prevent bacterial transfer, yet also contains emollients to protect against dryness and skin irritation. Its gel formulation prevents drip and run-off during usage. Packaged six per case.
