# 3M™ Clean-Walk Framed Mats

## 5840 Series

---

### Description

3M™ Clean-Walk Framed Mats 5840 Series feature a non-skid plastic base with a pad comprised of a multi-sheeted adhesive system that removes dirt and contaminants from shoe soles, wheels and other passing objects on contact. The pad offers 60 removable adhesive polyethylene sheets that lock dirt in place until discarded.

### Special Features

- Contains antimicrobial properties that inhibit fungal growth in the mat.
- Non-skid polystyrene backing (framed mat) stays securely in place and is ideal for use on carpeted surfaces.
- Framed mat is completely portable and reusable, simply adhere a 3M™ Clean-Walk Replacement Pad 5842.
- Removable adhesive sheets hold dirt securely until discarded to help provide a cleaner work environment.
- Individually tabbed and numbered sheets remove quickly and easily, exposing a clean sheet ready for immediate use.
- Numbered sheets help ensure one sheet removal and identify the number of remaining applications.

- Low profile construction reduces the risk of workers tripping and allows free movement of foot or wheel traffic.
- Unlike beveled edged products, edge remains clean during use.
- Helps extend the life of floor and carpeted surfaces by reducing the amount of contamination caused by foot traffic.

### Applications

- For use in industrial settings to prevent contamination between high traffic production areas and office environments.
- Ideal for fabricated metal shops, machinery and electronics equipment operations, printing and publishing facilities, construction and remodeling projects, health care facilities, warehouses, office, commercial and government buildings.
- For use in clean room entrances.
- Perfect for use with other non-adhesive mats for a complete mat protection program.

### Application Techniques

- Apply to a clean surface free of dirt, oil and other contaminants.
- Not intended for outdoor use or use in areas with excessive moisture or direct sunlight.
