

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## The perfect combination...

### for weatherproof coax terminations.

The new Greenlee XFC Series of F-Style Compression Connectors and the 60807 Compression Crimping Tool are the perfect combination for weatherproof coax terminations. The combination of weatherproof compression connectors and crimping tool has become a popular solution for CATV, Digital Satellite, Security and Residential structured wiring installations. Traditional hex crimped connections can cause performance issues by allowing moisture migration along the cable and into the connector.

The patented (US 6,241,553) XFC Series provides a dual seal, making these connectors appropriate for use in either indoor or outdoor applications. The plastic sleeve provides external protection when it is compressed into the

connector along the cable, and a rubber o-ring provides internal protection as it seals when the 7/16" nut is tightened to an F port. The plastic sleeves are color-coded to quickly determine which connector to use with a RG6, RG6 Quad-shield or RG59 cable.

The 60807 Compression Crimping Tool terminates most types of compression connectors with ease. The tool is fully adjustable to accommodate multiple connector types from an assortment of manufacturers. Crimping dies are supplied for terminating F-style and RCA connectors, with convenient storage for the extra parts built into the handle.

## PRODUCT FEATURES

### COMPRESSION CRIMPING TOOL

- **Requires less force** than a traditional hex-style crimp
- **Ergonomic Sanoprene grips** reduce hand fatigue
- **Terminates most compression-style connectors**
- **Fully adjustable** for crimping different coax connector types

### F-STYLE COMPRESSION CONNECTORS

- **Dual-protection** with external sleeve and internal o-ring
- **360-degree sleeve crimp** prevents moisture migration
- **O-ring provides internal seal** when the 7/16" nut is tightened
- **Use for both indoor and outdoor applications**
- **Color-coded sleeves** for easy identification of cable compatibility
- 70 lbs pull-out strength **exceeds SCTE cable retention standard** IPS-SP-405
- **Terminates easily** using any compression tool

## SPECIFICATIONS

Tool Dimensions- 7.2" x 2.2" x 0.8"

### Cable Preparation:

Braid and Dielectric- 1/4"  
Center Conductor- 5/16"
