### Poly-Onyx™ Wipes

**Product# 6259BESD, 6254BESD**

#### Product Description

Poly-Onyx™ ESD Wipes ESD combine several advancements and desirable features into one wipe. They are made from black monofilament polyester no-run knit, providing excellent strength, good absorbency and chemical compatibility. These wipers are a good choice for general clean room and equipment maintenance, or any critical applications where lint or particles can be detrimental. However, their black color makes them especially valuable as an inspection wipe for translucent or light colored particulate contamination and dusts; as well as for make-up on clean room workers. Special static dissipative fibers are also woven into the fabric to safely relieve potentially damaging static charge.

- Excellent solvent and acid resistance
- Monofilament "no-run" construction does not release loose fibers
- Excellent durability for cleaning rough, abrasive, or irregular surfaces
- Low ionic, nonvolatile residue and particle contamination
- Good absorbency
- Available stacked and vacuum packed
- Laser sealed edge
- Static Dissipative
- Class 100 – 1000 (ISO 5-6) Clean room

#### Typical Applications

Poly-Wipes can be used to clean:

- Semiconductor Wafer Fabs
- Aerospace Production Areas
- Disk Drives Production Areas
- Pharmaceutical / Biotechnical Production Areas
- General Clean room Cleaning
- Dust and Make-up Detection / Inspection
- Clean static sensitive surfaces

#### Compatibility

Poly-Onyx™ ESD Wipes are compatible with most common solvents such as isopropyl alcohol, methanol and ketones such as acetone or methyl ethyl ketone. These wipes are generally compatible with dilute or weak bases, as well as with most dilute or weak acids.
