imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Product specification

3.3 V 32-bit edge-triggered D-type flip-flop; 3-state

74LVT32374

FEATURES

- 32-bit edge-triggered flip-flop
- 3-state buffers
- Output capability: +64 mA/–32 mA
- TTL input and output switching levels
- Input and output interface capability to systems at 5 V supply
- Bus-hold data inputs eliminate the need for external pull-up resistors to hold unused inputs
- · Live insertion/extraction permitted
- Power-up reset
- Power-up 3-state
- No bus current loading when output is tied to 5 V bus
- Latch-up protection exceeds 500 mA in accordance with JEDEC std 17
- ESD protection exceeds 2000 V in accordance with MIL STD 883 method 3015 and 200 V in accordance with machine model.

QUICK REFERENCE DATA

DESCRIPTION

The 74LVT32374 is a high-performance BICMOS product designed for V_{CC} operation at 3.3 V.

The 74LVT32374 is a 32-bit edge-triggered D-type flip-flop featuring non-inverting 3-state outputs. The device can be used as four 8-bit flip-flops, or two 16-bit flip-flops or one 32-bit flip-flop. On the positive transition of the clock (CP), the Q outputs of the flip-flop take on the logic levels set-up at the D inputs.

LIMITING VALUES

In accordance with the Absolute Maximum Rating System (IEC 60134); note 1.

SYMBOL	PARAMETER	CONDITIONS	MIN.	TYP.	MAX.	UNIT
V _{CC}	supply voltage		-0.5	_	+4.6	V
I _{IK}	input diode current V _I < 0 V		_	-50	_	mA
VI	input voltage	note 2	-0.5	_	+7.0	V
I _{OK}	output diode current		-	-50	_	mA

lo	output current	output in LOW state	_	128	_	mA
		output in HIGH state	_	-64	_	mA
T _{stg}	storage temperature		-65	_	+150	°C

Notes

1. The performance capability of a high-performance integrated circuit in conjunction with its thermal environment can create junction temperatures which are detrimental to reliability. The maximum junction temperature of this integrated circuit should not exceed 150 °C.

2. The input and output negative voltage ratings may be exceeded if the input and output clamp current ratings are observed.

Notes

1. All typical values are measured at V_{CC} = 3.3 V and T_{amb} = 25 °C.

- 2. For valid test results, data must not be loaded into the flip-flops (or latches) after applying power.
- 3. Unused pins at $V_{\text{CC}}\xspace$ or GND.
- 4. This is the bus hold overdrive current required to force the input to the opposite logic state.
- 5. This parameter is valid for any V_{CC} between 0 V and 1.2 V with a transition time of up to 10 ms. From V_{CC} = 1.2 V to V_{CC} = 3.3 V \pm 0.3 V a transition time of 100 µs is permitted. This parameter is valid for T_{amb} = 25 °C only.
- 6. I_{CCZ} is measured with outputs pulled to V_{CC} or GND.
- 7. This is the increase in supply current for each input at the specified voltage level other than V_{CC} or GND.

Notes

- 1. Please consult the most recently issued data sheet before initiating or completing a design.
- 2. The product status of the device(s) described in this data sheet may have changed since this data sheet was published. The latest information is available on the Internet at URL http://www.semiconductors.philips.com.
- 3. For data sheets describing multiple type numbers, the highest-level product status determines the data sheet status.

DEFINITIONS

Short-form specification — The data in a short-form specification is extracted from a full data sheet with the same type number and title. For detailed information see the relevant data sheet or data handbook.

Limiting values definition — Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 60134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

Application information — Applications that are described herein for any of these products are for illustrative purposes only. Philips Semiconductors make no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

DISCLAIMERS

Life support applications — These products are not designed for use in life support appliances, devices, or systems where malfunction of these products can reasonably be expected to result in personal injury. Philips Semiconductors customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips Semiconductors for any damages resulting from such application.

Right to make changes — Philips Semiconductors reserves the right to make changes in the products including circuits, standard cells, and/or software described or contained herein in order to improve design and/or performance. When the product is in full production (status 'Production'), relevant changes will be communicated via a Customer Product/Process Change Notification (CPCN). Philips Semiconductors assumes no responsibility or liability for the use of any of these products, conveys no licence or title under any patent, copyright, or mask work right to these products, and makes no representations or warranties that these products are free from patent, copyright, or mask work right infringement, unless otherwise specified.
