Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## Electrical Ratings

Chart shown for non-shorting (break before make) contacts, resistive load.

CURVE A: 220 Vac
CURVE B: 115 Vac or 30 Vdc
One cycle is $360^{\circ}$ rotation and a return through all switch positions to the starting position. The data for the curve was measured at sea level, $25^{\circ} \mathrm{C}$ and $68 \%$ relative humidity with the following limiting criteria:
Contact Resistance: 50 milliohms maximum (15 milliohms initially).
Insulation Resistance: 10,000 Mohms minimum between mutually insulated parts.

Voltage Breakdown: 500 Vac between mutually insulated parts.
Life Expectancy: 10,000 cycles at 200 milliamps. One cycle is $360^{\circ}$ rotation and a return through all switch positions to the starting position. Low Level Rating: Make and break a 50 mV , 1 milliamp, resistive load for 10,000 cycles with a maximum contact resistance of 50 milliohms.

Contact Grayhill for information if the life limiting criteria is more critical than those listed, if the required cycles of operation are greater than those listed, if a larger make and break current is required than the one listed for the desired number of cycles, or if elevated temperatures or reduced pressures are part of the operating environment.

## Materials and Finishes

Switch Base: Diallyl per MIL-M-14
Detent Cover and Detent Rotor in Styles AP,
AF, BP, and BF: Phenolic per MIL-M-14
Bushing: Brass, tin zinc plating

Stop Pin: Stainless steel, passivated Detent Balls: Steel, nickel-plated
Detent and Contact Springs: Tinned music wire
Rotor Contact: Silver cad-oxide, gold-plated
Terminals and Common: Brass, gold plate .00002" minimum thickness over silver plate .0003" minimum.
Shaft in Style BF or BP: Zinc
Integral Knob and Detent Rotor in Style CF or CP: Red Thermoplastic
Mounting Hardware for Style BF or BP: One mounting nut .062" thick by .312" across flats and one external tooth lockwasher supplied with each switch. Mounting nut is brass, zinc plated and lockwasher is spring steel.

## Additional Characteristics

Contact Type: Non-shorting, wiping contacts
Terminals: Switches are provided with the full circle of terminals regardless of the number of active positions.
Stop Strength: 8 ounce-inches minimum
