Product Highlights

Perma-Seal terminals and splices give you long-lasting, moisture-proof connections that withstand water, salt, condensation, corrosion and heat, all of which cause serious problems for conventional, unsealed splices. The inner wall of the heat-shrinkable Perma-Seal sleeve is lined with a special hot-melt adhesive that is inert at room temperature, permitting wires to be inserted easily into the splices and terminals. As the sleeve is heated, the adhesive melts and flows under pressure from the tubing.

Features and Benefits

- Perma-Seal splices and terminals resists abrasion and cutting.
- The insulation material shrinks up to 40% faster than comparable nylon or polyolefin products.
- Low shrink temperature

Applications

- Farm equipment
- Ships
- Pumps
- Generators
- Material handling equipment
- Factory floor equipment
