Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

### Capacitance Meter

Model 830B

B&K Precision Corporation's Model 830B Capacitance Meter is a compact, hand held, light weight, battery powered test unit featuring a large 41/2 digit LCD display, 11,000 counts resolution, and nine (9) automatically selected ranges with full scale value from 1.0pF to 199.99mF. Designed to meet the latest international safety standards, the Model 830B's dedicated chip and microprocessor allow the user to program high/low limits, or utilize pre-programmed capacitor tolerances. Software and cabling are provided for PC based data logging and monitoring via a USB interface. The PC based data logging capability allows the user to remotely monitor, record, and track problems and significantly improve maintenance performance. Model 830B Capacitance Meter is the ideal device for measuring values, inspection, sorting capacitors, and testing capacitors against standard tolerances.

The Model 830B Capacitance Meter's large 41/2 digit LCD dual display can simultaneously display values and deviations from selected tolerances. The unit can also sort on preset tolerances of 1, 5, and 10%. The built-in chip and microprocessor allows the user to program unique values to sort specific circuit applications. Outstanding features of the Model 830B include:

- Dual Display simultaneously displays value and deviation from selected tolerance
- Sort on preset tolerance of 1, 5, and 10%
- Program unique values to sort for specific circuit applications
- USB PC interface and data logging software included
- 9V battery operated
- Three year warranty
