# imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# 89HP0604SB 4-Channel 6Gbps SAS/SATA Signal Repeater

#### ANALOG & PF | INTERFACE & CONNECTIVITY | CLOCKS & TIMING | MEMORY & LODIC | TOUCH & USER INTERFACE | VIDEO & DISPLAY | AUDIO

#### **FEATURES**

 Compensates for cable and PCB trace attenuation and ISI jitter

Integrated Device Technology

- Programmable receiver equalization up to 24dB
- Programmable transmitter swing and de-emphasis
- Recovers data stream even when the differential signal eye is completely closed due to trace attenuation and ISI jitter
- Full SAS/SATA protocol support

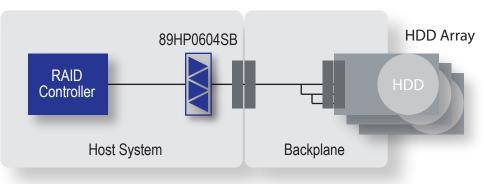

- Configurable via external pins
- Leading edge power minimization in active and shutdown modes
- No external bias resistors or reference clocks required
- Channel mux mode, demux mode, 1 to 2 channels multicast, and Z-switch function mode
- Available in a 36-pin QFN package (4.0 x 7.5mm with 0.5mm pitch)

#### BENEFITS

- Extends maximum cable length to over 8 meters and trace length over 48 inches in SAS/SATA applications
- Minimizes BER

#### **APPLICATIONS**

- Blade servers, rack servers
- SAS/SATA instrumentation
- Storage systems
- Cabled SAS/SATA devices

### **Device Overview**

The IDT 89HP0604SB is a 6Gbps SAS/SATA<sup>®</sup> Repeater device featuring IDT EyeBoost<sup>™</sup> technology that compensates for cable and board trace attenuations and ISI jitter, thereby extending connection reach. The device is optimized for SAS/SATA high speed serial data streams and contains four data channels, each able to process 6Gbps transmission rates. Each channel consists of an input equalizer and amplifier, signal detection with glitch filter, as well as programmable output swing and de-emphasis. Allowing for application specific optimization, the 89HP0604SB, with its configurable receiver and transmitter features, is ideal for SAS/SATA applications using a wide combination of cables and board trace materials.

All modes of active data transfer are designed with minimized power consumption. In full shutdown mode, the part consumes less than 40mW in worst case environmental conditions.

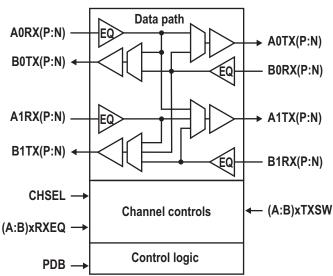

### **SAS/SATA Compliance**

The device was designed to provide end users with features needed to comply with SAS/SATA system application requirements:

- SAS/SATA Out-of-Band (00B) Support
- Jitter, eye opening, and all other
- AC and DC specifications.

### 89HP0604SB Block Diagram

The 89HP0604SB contains four high speed channels as shown. Each channel can be routed to different outputs. Depending on user configuration via mode selections, input traffic can be muxed or demuxed. Powerdown (PDB) is provided for state and channel control.
