

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Raspberry Pi Cookbook, 2nd Edition
Software and Hardware Problems and Solutions

Simon Monk

ISBN: 9781491939109

Date Published: 6/25/2016

Pages: 510

Paperback

7 in W | 9.2 in H

Computers / Hardware

Summary:

With millions of new users and several new models, the Raspberry Pi ecosystem continues to expand—along with a lot of new questions about the Pi's capabilities. The second edition of this popular cookbook provides more than 240 hands-on recipes for running this tiny low-cost computer with Linux, programming it with Python, and hooking up sensors, motors, and other hardware—including Arduino and the Internet of Things.

Prolific hacker and author Simon Monk also teaches basic principles to help you use new technologies with Raspberry Pi as its ecosystem continues to develop. This cookbook is ideal for programmers and hobbyists familiar with the Pi through resources, including *Getting Started with Raspberry Pi* (O'Reilly). Python and other code examples from the book are available on GitHub.

- Set up your Raspberry Pi and connect to a network
- Work with its Linux-based operating system
- Program Raspberry Pi with Python
- Give your Pi "eyes" with computer vision
- Control hardware through the GPIO connector
- Use Raspberry Pi to run different types of motors
- Work with switches, keypads, and other digital inputs
- Use sensors to measure temperature, light, and distance
- Connect to IoT devices in various ways
- Create dynamic projects with Arduino
