## : ©hipsmall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# Two-circuit Limit Switch/Long-life Two-circuit Limit Switch WL-N/WLM-N 

## Select the Best Two-circuit Switch for the Operating Environment and Application from a Wide Range of Models

- A wide selection of models is available, including general-purpose, environment-resistant, and spatterprevention switches.
- Standard-feature gold-clad crossbar contacts provide high reliability.
- Applicable to either standard loads or microloads.
- Switches with lever actuators provide $90^{\circ}$ overtravel, one-side operation, and four-direction head mounting.
- Approved standards: EN/IEC, UL, cUL, and CCC. Contact your OMRON representative for information on approved models.

```
Be sure to read Safety Precautions on page 44 to 48 and
```

Safety Precautions for All Limit Switches.

## Features

## Standard Switches

Many Variations in Standard Limit Switches A Wide Range of Models
The series includes includes many different actuators that you select to match the workpiece shape and motion, and a wide range of Switch variations, such as models with operation indicators for easier working and maintenance and models with different types of connectors.

## Environment-resistant Switches

Select from Six Types of Environment Resistance
The series includes airtight switches, hermetic switches, heatresistant switches, low-temperature switches, corrosion-proof switches, and weather-proof switches. You can select the model based on the onsite environment.

## Spatter-prevention Switches

Excellent Performance on Arc Welding Lines or Sites with Spattering Cutting Powder
Ideal for Welding Sites
These Switches use stainless steel or resin to prevent the adhesion of spatter.
They can be used to reduce problems caused by zinc power generated during welding.

## Long-life Switches

Mechanical Endurance of 30 Million Operations Long-life Models for High-frequency Applications
A mechanical durability of 30 million operations minimum is provided. The head features a double-seal structure with a head cap and oil seal.

## Features Common to All Switches

## DPDB Operation

The double-pole, double-break structure ensures circuit braking.

Degree of Protection; IP67

## Approved Standards to Aid Export Machines

The Switches are certified for EN/IEC, UL, cUL, and CCC making them ideal for export machines.

## Applicable to Either Standard Loads or Microloads

Standard-feature gold-clad contacts provide high reliability. The use of a high-contact-pressure crossbar structure also increases reliability.

## Easy to Work With

Downsizing of the built-in switch has increased the space to house the wiring.
The insulating paper that was often in the way when wiring has been eliminated.
Nickle-plated steel screws are used for the terminal screws.
The screws adhere to magnetized screwdrivers to prevent dropping and loosing them.

## Models with Connectors to Reduce Wiring

A neon lamp or LED indicates the operating status.
The 3D structure of the lamp cover disperses light so you can check the operating status from the side.

## WL-N/WLM-N

## Product Configuration

WLMCA2- $\square$-N

WLMG2- $\square$-N

WLMGCA2- $\square$-N

## Environment-resistant Switches

| Type | Item Model | Environment-resistant |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Application | Environment-resistant construction | Applicable models |
| Airtight seal | WL $\square$-55-N | For use in locations subject to cutting oil or water. | Uses an airtight built-in switch. <br> Note: Use the SC Connector for the conduit opening. | All models except the lowtemperature and heat-resistant models <br> Note: Models can be produced using standard actuators. |
| Hermetic seal (Molded terminals/ Anti-coolant) | WL $\square$-139-N |  | Refer to page 29 for information on the environ-ment-resistant construction of Switches with Hermetic Seals. | All models except the lowtemperature and heat-resistant models <br> Note: Models can be produced using standard actuators. Only the WLCA2-N, WLGCA2-N, or WLG2-N can be produced for the WL $\square$ -141-N and WLD-145-N. |
|  | WL $\square$-140-N |  |  |  |
|  | WL $\square$-141-N |  |  |  |
|  | WL $\square$-145-N |  |  |  |
|  | WLD-RP40-N |  |  |  |
|  | WL $\square$-RP60-N |  |  |  |
| Low-temperature | WL $\square$-TC-N | Can be used at a temperature of $-40^{\circ} \mathrm{C}$ (operating temperature range: -40 to $40^{\circ} \mathrm{C}$ ), but cannot withstand icing. | - Uses a general-purpose built-in switch. <br> - Epichlorhydrin rubber is used for rubber parts such as the O-ring, gasket, etc. | All models except airtight seal, hermetic seal, heatresistant, corrosion-proof, and indicator-equipped models |
| Heat-resistant | WL $\square$-TH-N | Can be used in temperatures of $120^{\circ} \mathrm{C}$ (operating temperature range: 5 to $120^{\circ} \mathrm{C}$ ). | - Fluorine rubber is used for rubber parts such as the O-ring, gasket, etc. | All models except airtight seal, hermetic seal, heatresistant, corrosion-proof, and indicator-equipped, nyIon roller (WLCA2-26N-N), seal roller models, and resin rod (WLNJ-2-N) models |
| Corrosion-proof | WL $\square$-RP-N | For use in locations subject to corrosive gases and chemicals. | - Diecast parts, such as the switch box, are made of corrosion-proof aluminum. <br> - Rubber sealing parts are made of fluorine rubber, which aids in resisting oils and chemicals. <br> - Exposed nuts and screws (except the actuator section) are made of stainless steel. <br> - Moving and rotary parts such as rollers are made of sintered stainless steel or stainless steel. <br> - The head, box, and cover are yellow. | All models except fork lever lock (WLCA32-41 to -44N ), low-temperature, heatresistant, and indicatorequipped models |
| Weather-proof | WL $\square$-P1-N | For use in parking lots and other outdoor locations. | - Rubber parts are made from epichlorhydrin rubber, which has a high-tolerance to changes in temperature. <br> - Rollers are made of stainless steel to improve corrosion resistance. <br> - Exposed nuts and screws are made of stainless steel. | Only basic (WLCA2-N/ CA12-N/CL-N), and highsensitivity overtravel (WLG2-N/G12-N/GL-N) models (excluding heat-resistant models). <br> This does not apply to lowtemperature or heat-resistant, or indicatorequipped switches. |

## Selection Guide

With the WL-N Series, OMRON will combine the switch, actuator, and wiring method required to build the ideal switch for your application.

The WL-N Series consists of four basic types: general-purpose, environment-resistant, spatter-protection, and long-life switches. WLCA2-N Switches can be used for the most common applications.

## According to Operating Environment

|  | Environment | Key specifications |  | Models |
| :---: | :---: | :---: | :---: | :---: |
|  | Normal | Water-resistant to IP67. | WLD-N <br> WLM $\square-N$ | General-purpose Switches Long-life Switches |
|  | High-temperature | $\stackrel{+5^{\circ} \mathrm{C}}{\square}+120^{\circ} \mathrm{C}$ <br> To increase heat resistance, the rubber material (fluorine rubber) and the plunger material (PEEK) have been changed. | WLD-TH-N | Heat-resistant Switches *1 |
|  | Low-temperature | To increase resistance to cold, epichlorhydrin rubber and other measures are used. | WLD-TC-N | Low-temperature Switches *1 |
|  | Outdoors | Rubber parts are made from epichlorhydrin rubber, which has a high-tolerance to changes in temperature. <br> Stainless steel is used for the screws. <br> Rollers are made of stainless steel to provide superior corrosion resistance. | WLD-P1-N | Weather-proof Switches *1 |
|  | Chemicals and oil | Corrosion-proof specifications have been used for the housing, fluorine rubber has been used for rubber parts, and stainless steel has been used for screws and nuts (except for the actuator) to increase resistance to oils, chemicals, and weather. | WLD-RP-N | Corrosion-proof Switches *1 |
|  | Water drops and mist | Uses an airtight built-in switch. | WLD-55-N | Airtight Switches *1 |
|  | Constant water drops and mist | Cables are attached. Uses a general-purpose built-in switch. The cover screws, case cover, and conduit opening are molded from epoxy resin to increase the seal. (The cover cannot be removed.) | WLD-139-N <br> Hermetic, M Switches *1 | ded-terminal |
|  |  | Cables are attached. Uses an airtight built-in switch. The case cover and conduit opening are molded from epoxy resin to increase the seal. (The cover cannot be removed.) The SC connector can be removed, so it is possible to use flexible conduit for the cable. | WLD-RP40-N <br> Hermetic, Molded-terminal Switches *1, *2 |  |
|  |  | Cables are attached. Uses an airtight built-in switch. <br> The cover screws, case cover, and conduit opening are molded from epoxy resin to increase the seal. <br> (The cover cannot be removed.) | WLD-140-N <br> Hermetic, M <br> Switches *1 | ded-terminal <br> 2 |
|  | Constant water drops or splattering cutting powder | Cables are attached. Uses an airtight built-in switch. <br> The cover screws, case cover, and conduit opening are molded from epoxy resin to increase the seal. <br> (The cover cannot be removed.) <br> Double seal against oil including head cap countermeasure for cutting chips and an oil seal. <br> -141: The Head section is molded from epoxy resin; Head direction cannot be changed. <br> -145: The Head section is molded from epoxy resin; Head can be in any of 4 directions. | WL $\square$-141-N, -145-N <br> Hermetic, Molded-terminal <br> Switches *1, *2 <br> (Only the WLCA2-N, WLG2-N, and <br> WLGCA2-N, can be produced.) |  |
|  | Coolant | Cables are attached. Uses an airtight built-in switch. <br> The cover screws, case cover, conduit opening, and head screws are molded from epoxy resin to increase the seal. <br> (The cover and head cannot be removed.) <br> Rubber parts are made from fluorine rubber to increase resistance to coolant. | WLD-RP60-N <br> Hermetic, Molded-terminal Switches *1, *2 |  |
|  | Spattering from welding | To prevent spatter during welding, a heat-resistant resin is used for the indicator cover and screws and rollers are all made from stainless steel. | WL■-S-N | Spatter-prevention Switches |

*1. Not all functions can be combined with environment-resistant switches. Refer to the applicable models on the previous page.
*2. Refer to page 29 for information on the construction of Hermetic Switches.

## According to Application Conditions

## According to Ease of Installation and Maintenance

|  | Conditions | Key specifications | Models |
| :---: | :---: | :---: | :---: |
|  | Daily inspections and maintenance checks | Neon lamp <br> 125 to 250 VAC <br> Switching light-ON between operating/not operating. (Switching is not possible for Switches with Molded Terminals.) | WL $\square$-LE-N <br> General-purpose, Indicator-equipped (Neon Lamp) Switches WL $\square$-LES-N <br> Spatter-prevention, Indicator-equipped (Neon Lamp) Switches |
|  |  | LED <br> 10 to 115 VAC/DC <br> Switching light-ON between operating/not operating. (Switching not possible for models with molded terminals.) | WL $\square$-LD-N <br> General-purpose, Indicator-equipped (LED) Switches WL $\square$-LDS-N <br> Spatter-prevention, Indicator-equipped (LED) Switches |
|  | Screw tightening and installation | Screw terminals. No ground terminal. Conduit size: G1/2 | WL $\square$-N General-purpose Switches WLM $\square$-N Long-life Switches |
|  |  | Screw terminals. Ground terminal. Conduit size: 4 sizes | WL $\square$-N General-purpose Switches |
|  | One-touch connector attachment | Direct-wired connector, 2-conductor. Greatly reduces wiring work. | WL $\square-\square$ LDK13 $\square$-N <br> General-purpose, Direct-wired Connector Switches WLM $\square$-LDK13 $\square$-N <br> Long-life, Direct-wired Connector Switches |
|  |  | Direct-wired connector, 4-conductor. Greatly reduces wiring work. | WL $\square-\square L D K 43 \square-N$ <br> General-purpose, Direct-wired Connector Switches WLM $\square$-LDK43 $\square$-N <br> Long-life, Direct-wired Connector Switches |
|  | Connector attachment in control and relay boxes | Pre-wired connector, 2-conductor. Greatly reduces wiring work. Smartclick connectors for even easier maintenance. | WLD-■LD-M1 $\square J-N$ <br> General-purpose, Pre-wired Connector Switches WL $\square-\square$ S-M1 $\square \mathrm{J}-1-\mathrm{N}$ <br> Spatter-prevention, Pre-wired Connector Switches WLM $\square-L D-M 1 \square J-N$ <br> Long-life, Pre-wired Connector Switches |
|  |  | Pre-wired connector, 4-conductor. Greatly reduces wiring work. Smartclick connectors for even easier maintenance. | WL $\square$ - $\square$ LD- $\square$ GJ-N <br> General-purpose, Pre-wired Connector Switches WL $\square-\square S$ - $\square$ GJS-N <br> Spatter-prevention, Pre-wired Connector Switches WLM $\square$-LD- $\square$ GJ-N <br> Long-life, Pre-wired Connector Switches |

(The cover cannot be removed and the head direction <br> cannot be changed.) <br> Double seal against oil including head cap countermeasure for <br> cutting chips and an oil seal. |
| 145 | Airtight built-in switch. Cable is attached. <br> Molded conduit opening, cover, and cover screws. (The cover <br> cannot be removed. The head can be mounted in any of 4 di- <br> rections.) <br> Double seal against oil including head cap countermeasure for <br> cutting chips and an oil seal. |
| RP40 | Airtight built-in switch. Cable is attached. <br> Molded conduit opening and cover. (The cover cannot be re- <br> moved.) <br> SC Connector can be removed, so it is possible to use flexible <br> conduits for the cable. |
| RP60 | Airtight built-in switch. Cables are attached. <br> Molded conduit opening, cover, cover screws, and head <br> screws. (The cover cannot be removed and the head direction <br> cannot be changed.) <br> Fluorine rubber is used for all rubber parts. |

(6) Conduit Size, Ground Terminal Specifications

| Code | Specifications |  |
| :---: | :--- | :--- |
|  | Conduit Size | Ground terminal |
| Blank | G1/2 | None |
| G1 | G1/2 |  |
| G | Pg13.5 |  |
| Y | M20 |  |
| TS | $1 / 2-14 N P T$ |  |

*2. Models with ground terminals are certified for EN/IEC (CE Marking).
(7) Indicator Type

| Code | Specifications |
| :---: | :--- |
| Blank | No indicator |
| LE | Neon lamp: 125 to 250 VAC |
| LD | LED (10 to 115 VAC/DC) |

*3. Cannot be combined with Corrosion-proof (RP), Weather-proof (P1), Heat-resistant (TC), or Low-temperature (TC) Switches.
(8) Indicator Wiring Specification

| Code | Specifications |
| :---: | :--- |
| 2 | NC connection: Light-ON when operating |
| 3 | NO connection: Light-ON when not operating |

*4. Always include the indicator wiring specification if you specify a (5) hermetic structure and an (7) indicator.

## (9) Lever Type

| Code | Specifications |
| :---: | :--- |
| Blank | Standard lever (Allen-head bolt) |
| A | Double nut lever |

Model Number Legend (Not all combinations are possible. Contact your OMRON representative for details.)

 Indicator-equipped (Light-ON when Not Operating) Switches *1

Note: Leakage current from indicator circuit may cause load malfunction (i.e., the load may remain ON). Make sure that the load operating current is higher than the leakage current. For countermeasures, refer to technical support on your OMRON website.
*1. Light-ON when not operating means the indicator is lit when the actuator is free and is not light when the Switch contacts (NO) close when the actuator rotates or is pushed down.
*2. The position of the positioning piece is not always the same. If using an L-shaped connector causes problems in application, use a straight connector.

Note: 1. The above figures are for steady-state currents
2. Inductive loads have a power factor of 0.4 min . AC ) and a time constant of 7 ms max. (DC).
3. A lamp load has an inrush current of 10 times the steady-state current
4. A motor load has an inrush current of 6 times the steady-state current.
5. For PC loads, use the microload models.

| Inrush current | NC | 30 A max.(15 A max. *) |
| :--- | :---: | :---: |
|  | NO | 20 A max.(10 A max. ${ }^{*}$ ) |

* For high-sensitivity switches.

Minimum applicable load $\quad 5$ VDC 1 mA , resistive load, $P$ level

## Operation indicator Switches

| Model | Item | Max. rated voltage | Leakage current (mA) |
| :--- | :--- | :---: | :---: |
| WL-LE-N | Neon lamp | 125 AC | Approx. 0.6 |
|  |  | 250 AC | Approx. 1.9 |
| WL-LD-N | LED | 10 to $24 \mathrm{VAC} / \mathrm{DC}$ | Approx. 0.4 |
|  |  | $115 \mathrm{VAC} / \mathrm{DC}$ | Approx. 0.5 |

## Characteristics

| Degree of protection |  | IP67 |
| :---: | :---: | :---: |
| Durability *1 | Mechanical | 15,000,000 operations min. *2 |
|  | Electrical | 750,000 operations min. *3 |
| Operating speed |  | $1 \mathrm{~mm} / \mathrm{s}$ to $1 \mathrm{~m} / \mathrm{s}$ (in case of WLCA2-N) |
| Operating frequency | Mechanical | 120 operations/minute min. |
|  | Electrical | 30 operations/minute min. |
| Rated frequency |  | $50 / 60 \mathrm{~Hz}$ |
| Insulation resistance |  | $100 \mathrm{M} \Omega$ min. (at 500 VDC ) |
| Contact resistance |  | $25 \mathrm{~m} \Omega$ max. (initial value for the built-in switch when tested alone) |
| Dielectric strength | Between terminals of the same polarity | 1,000 VAC (600 VAC), $50 / 60 \mathrm{~Hz}$ for 1 min |
|  | Between currentcarrying metal part and ground | 2,200 VAC (1,500 VAC), $50 / 60 \mathrm{~Hz}$ for $1 \mathrm{~min} * 4$ |
|  | Between each terminal and non-currentcarrying metal part | 2,200 VAC (1,500 VAC), $50 / 60 \mathrm{~Hz}$ for $1 \mathrm{~min} * 4$ |
| Vibration resistance | Malfunction | 10 to $55 \mathrm{~Hz}, 1.5-\mathrm{mm}$ double amplitude *5 |
| Shock resistance | Destruction | 1,000 m/s ${ }^{2}$ max. |
|  | Malfunction | $300 \mathrm{~m} / \mathrm{s}^{2}$ * |
| Ambient operating temperature |  | -10 to $+80^{\circ} \mathrm{C}$ (with no icing) *6 |
| Ambient operating humidity |  | 35\% to 95\% RH |
| Weight |  | Approx. 255 g (in case of WLCA2-N) |

Note: 1. The above figures are initial values.
2. The figures in parentheses for dielectric strength are those for the high-sensitivity switches models.
*1. The values are calculated at an operating temperature of $+5^{\circ} \mathrm{C}$ to $+35^{\circ} \mathrm{C}$ and an operating humidity of $40 \%$ to $70 \%$ RH. Contact your OMRON sales representative for more detailed information on other operating environments.
*2. High-sensitivity switches and switches with flexible rod actuators: 10 million operations min. 500,000 operations min. for weather-proof models.
*3. Durability is 500,000 operations min. for high-sensitivity models.
500,000 operations min . for weather-proof models.
Contact your OMRON representative for information on environment-resistant switches.
*4. Switches with Connectors: 1,500 V.
*5. Except switches with flexible rod actuators.
${ }^{*} 6$. For low-temperature models this is $-40^{\circ} \mathrm{C}$ to $+40^{\circ} \mathrm{C}$ (with no icing). For heat-resistant models the range is $+5^{\circ} \mathrm{C}$ to $+120^{\circ} \mathrm{C}$.

| Ambient operating temperature |  | -10 to $+80^{\circ} \mathrm{C}$ (with no icing) |
| Ambient operating humidity |  | 35\% to 95\% RH |
| Weight |  | Approx. 255 g (in case of WLCA2-LDS-N) |

Note: 1. The above figures are initial values.
2. The figures in parentheses for dielectric strength are those for the highsensitivity overtravel models.
*1. The values are calculated at an operating temperature of $+5^{\circ} \mathrm{C}$ to $+35^{\circ} \mathrm{C}$ and an operating humidity of $40 \%$ to $70 \% \mathrm{RH}$. Contact your OMRON sales representative for more detailed information on other operating environments.
*2. Durability is $10,000,000$ operations min. for high-sensitivity models.
*3. Durability is 500,000 operations min . for high-sensitivity models.
500,000 operations min. for weather-proof models.
Contact your OMRON representative for information on Airtight Switches.
*4. Switches with Connectors: $1,500 \mathrm{~V}$.

| High-sensitivity | 115 AC |  | 5 |  |  | - |  |  |  |
|  | 115 DC |  | . 4 |  |  | - |  |  |  |
| Inrush current | NC |  |  | 30 A max. (15 A max. *) |  |  |  |  |  |
|  | NO |  |  | 20 A max. (10 A max. *) |  |  |  |  |  |

* For high-sensitivity overtravel models.

Minimum applicable load
5 VDC 1 mA , resistive load, P level

Direct-wired Connector and Pre-wired Connector Switches

| Model | Rated voltage (V) | Non-inductive load (A) |  |  |  | Inductive load (A) |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Resistive load |  | Lamp load |  | Inductive load |  | Motor load |  |
|  |  | NC | NO | NC | NO | NC | NO | NC | NO |
| Basic or high-precision | 115 AC |  |  | 3 | 1.5 |  | 3 | 3 | 2.5 |
|  | $\begin{aligned} & 12 \mathrm{DC} \\ & 24 \mathrm{DC} \\ & 115 \mathrm{DC} \end{aligned}$ |  | $\text { . } 8$ |  | 2 |  | $\begin{aligned} & 3 \\ & 0.8 \end{aligned}$ |  |  |
| High-sensitivity | 115 AC |  | 3 |  | - |  | - |  |  |
|  | 115 DC |  | . 4 |  | - |  | - |  |  |

Note: 1. The above figures are for steady-state currents.
2. Inductive loads have a power factor of 0.4 min . AC ) and a time constant of 7 ms max. (DC).
3. A lamp load has an inrush current of 10 times the steadystate current.
4. A motor load has an inrush current of 6 times the steadystate current.

## Characteristics

| Degree of protection |  | IP67 |
| :---: | :---: | :---: |
|  | Mechanical | 30,000,000 operations min. |
| Durability *1 | Electrical | $30,000,000$ operations min. ( 10 mA at 24 VDC, resistive load) <br> 750,000 operations min. (3 A at 115 VAC, resistive load) <br> High-sensitivity Switches: 500,000 operations min. (3 A at 115 VAC, resistive load) |
| Operating speed |  | $1 \mathrm{~mm} / \mathrm{s}$ to $1 \mathrm{~m} / \mathrm{s}$ (for WLMCA2-LD-N) |
| Operating frequency | Mechanical | 120 operations/minute |
|  | Electrical | 30 operations/minute |
| Rated frequency |  | $50 / 60 \mathrm{~Hz}$ |
| Insulation resistance |  | $100 \mathrm{M} \Omega$ min. (at 500 VDC) |
| Contact resistance |  | $25 \mathrm{~m} \Omega$ max. (initial value for the built-in switch when tested alone) |
| Dielectric strength (50/ 60 Hz for 1 min) | Between terminals of the same polarity | 1,000 VAC (600 VAC), $50 / 60 \mathrm{~Hz}$ for 1 min |
|  | Between cur-rent-carrying metal part and ground | ${ }_{* 2}^{2,200}$ VAC ( $1,500 \mathrm{VAC}$ ), $50 / 60 \mathrm{~Hz}$ for 1 min |
|  | Between each terminal and non-cur-rent-carrying metal part | ${ }_{*}^{2,200}$ VAC (1,500 VAC), $50 / 60 \mathrm{~Hz}$ for 1 min |
| Vibration resistance | Malfunction | 10 to $55 \mathrm{~Hz}, 1.5-\mathrm{mm}$ double amplitude |
| Shock resistance | Destruction | $1,000 \mathrm{~m} / \mathrm{s}^{2} \mathrm{max}$. |
|  | Malfunction | $300 \mathrm{~m} / \mathrm{s}^{2} \mathrm{max}$. |
| Ambient operating temperature |  | $-10^{\circ} \mathrm{C}$ to $+80^{\circ} \mathrm{C}$ (with no icing) |
| Ambient operating humidity |  | 35\% to 95\%RH |
| Weight |  | Approx. 255 g (for WLMCA2-LD-N) |

Note: 1. The above figures are initial values.
2. The figures in parentheses for dielectric strength are for the High-sensitivity Switches.
*1. The values are calculated at an operating temperature of $+5^{\circ} \mathrm{C}$ to $+35^{\circ} \mathrm{C}$, and an operating humidity of $40 \%$ to $70 \%$ RH. Contact your OMRON sales representative for more detailed information on other operating environments.
*2. Switches with Connectors: 1,500 V.
